

INDEX TO VOLUME 231

ABRAMS, R. M., GERHARDT, K. J., HUANG, X., PETERS, A. J. M. and LANGFORD, R. G., Musical experiences of the unborn baby (letter)	(1)253
AL-JUMAILY, A. See DING, J. J.	(1)125
AMABILI, M., Eigenvalue problems for vibrating structures coupled with quiescent fluids with free surface	(1)79
ANANTHKRISHNAN, N., SUDERSHAN, S., SUDHAKAR, K. and VERMA, A., Large-amplitude limit cycles in resonantly coupled oscillators (letter)	(5)1377
BALASHOV, D. B. See IRRETIER, H	(5)1271
BOUVET, P., VINCENT, N., COBLENTZ, A. and DEMILLY, F., Optimization of resilient wheels for rolling noise control	(3)765
BRACCIALI, A. and CASCINI, G., Measurement of the lateral noise emission of an UIC 60 rail with a custom device	(3)653
BRIOIST, J. J. See SEMBLAT, J. F. (letter)	(2)460
BRÜHL, S. and RÖDER, A., Acoustic noise source modelling based on microphone array measurements	(3)611
BULAVIN, L. A., SENCHUROV, S. P. and ZABASHTA, YU. F., Propagation of axisymmetric normal waves in infinite optical fiber with thin boundary layer	(5)1179
CAMPANAC, P., NONAMI, K. and DUHAMEL, D., Application of the vibration analysis of linear systems with time-periodic coefficients to the dynamics of a rolling tyre	(1)37
CARACCILO, R., GASPARETTO, A. and GIOVAGNONI, M., Measurement of the isotropic dynamic Young's modulus in a seismically excited cantilever beam using a laser sensor	(5)1339
CASCINI, G. See BRACCIALI, A.	(3)653
CETINKAYA, C., WU, C. and LI, C., Laser-based transient surface acceleration of thermoelastic layers	(1)195
CHAKRABORTY, S. and MUKHOPADHYAY, M., Estimation of in-plane elastic parameters and stiffener geometry of stiffened plates	(1)99
CHANG, Y.-F. See KANG, Y.	(2)343
CHANG, Y.-P. See KANG, Y.	(2)343
CHANUT, J. See VILLOT, M.	(3)711
CHAO, C.-P. and SHAW, S. W., The dynamic response of multiple pairs of subharmonic torsional vibration absorbers	(2)411
CHOI, S.-B. and HWANG, J.-H., Structural vibration control using shape memory actuators	(4)1168
CHUNG, J., OH, J.-E. and YOO, H. H., Non-linear vibration of a flexible spinning disc with angular acceleration	(2)375
CLARK, R. L. See WILSON, J. F.	(5)1311
CLEON, L.-M. and WILLAIME, A., Aero-acoustic optimization of the fans and cooling circuit on SNCF's X 72500 railcar	(3)925
COBLENTZ, A. See BOUVET, P.	(3)765
CORDIER, J.-F. and FODIMAN, P., Experimental characterization of wheel and rail surface roughness	(3)667
COX, S. J. See WANG, A.	(3)907
CRAIG, C., NEILSON, R. D. and PENMAN, J., The use of correlation dimension in condition monitoring of systems with clearance	(1)1
CROCKETT, A. R. and PYKE, J. R., Viaduct design for minimization of direct and structure-radiated train noise	(3)883
DE VOS, P. See JANSSEN, G.	(3)951
DE ROSA, M. A. and MAURIZI, M. J., Three approaches for the axial vibrations of bars on modified Winkler soil with nonclassical boundary conditions	(5)1257
DE BEER, F. G. and VERHEIJ, J. W., Experimental determination of pass-by noise contributions from the bogies and superstructure of a freight wagon	(3)639
DEMILLY, F. See BOUVET, P.	(3)765

- DIEHL, R. J. See KURZE, U. J. (3)497
- DIEHL, R. J., NOWACK, R. and HÖLZL, G., Solutions for acoustical problems with ballastless track
DINE, C. and FODIMAN, P., New experimental methods for an improved characterisation of the noise
emission levels of railway systems (3)899
- DING, J. J. and AL-JUMAILY A., A linear regression model for the identification of unbalance changes
in rotating machines (3)631
- DINGS, P., VERHEIJEN, E. and KOOTWIJK-DAMMAN, C., A traffic-dependent acoustical grinding
criterion (1)125
- DITTRICH, M. G. and JANSSENS, M. H. A., Improved measurement methods for railway rolling noise
(3)941
- DONG, Y. and HESS, D. P., Shock-induced loosening of dimensionally non-conforming threaded
fasteners (letter) (3)595
- DUHAMEL, D. See CAMPANAC, P. (2)451
- DUHAMEL, D. See YIN, H. P. (1)37
- DUPONT, P. See MCDANIEL, J. G. (2)259
- ELBERS, F. B. J., Methods and tools for monitoring and prediction of the large-scale environmental
impact of railway noise (2)433
- FÄRM, J., Interior structure-borne sound caused by the sleeper-passing frequency (3)961
