

*(Contents continued from outside cover)*

KOCATÜRK, T. and ŞİMŞEK, M., Vibration of viscoelastic beams subjected to an eccentric compressive force and a concentrated moving harmonic force	302
MAIDANIK, G., BECKER, K.J. and MAGA, L.J., Replacement of a summation by an integration in structural acoustics	323
NAIR, K.K., KIREMIDJIAN, A.S. and LAW, K.H., Time series-based damage detection and localization algorithm with application to the ASCE benchmark structure	349
LIU, Y. and SHEPARD JR., W.S., An improved method for the reconstruction of a distributed force acting on a vibrating structure	369
GAUDET, S., GAUTHIER, C. and LÉGER, S., The evolution of harmonic Indian musical drums: A mathematical perspective	388
FANG, X., TANG, J., JORDAN, E. and MURPHY, K.D., Crack induced vibration localization in simplified bladed-disk structures	395
KARTIK, V. and WICKERT, J.A., Vibration and guiding of moving media with edge weave imperfections	419
CHALHOUB, N.G., KFOURY, G.A. and BAZZI, B.A., Design of robust controllers and a nonlinear observer for the control of a single-link flexible robotic manipulator	437
BAHRA, A.S. and GREENING, P.D., Particularities of Newton's method in space frame force determination, utilising eigenpair functions	462
<b>Short Communications</b>	
WOODY, S.C. and SMITH, S.T., Damping of a thin-walled honeycomb structure using energy absorbing foam	491
SHIN, H., SUN, H. and LEE, S., Development of a new free wake model considering a blade-vane interaction for a low noise axial fan planform optimization	503
SUN, X., KUO, S.M. and MENG, G., Adaptive algorithm for active control of impulsive noise	516
