

*(Contents continued from outside cover)*

WU, G.Y. and SHIH, Y.S., Analysis of dynamic instability for arbitrarily laminated skew plates	315
BHANGALE, R.K., GANESAN, N. and PADMANABHAN, C., Linear thermoelastic buckling and free vibration behavior of functionally graded truncated conical shells	341
STEPHEN, N.G., The second spectrum of Timoshenko beam theory—Further assessment	372
KATSIKADELIS, J.T. and TSIATAS, G.C., Regulating the vibratory motion of beams using shape optimization	390
VARANASI, K.K. and NAYFEH, S.A., Damping of flexural vibration using low-density, low-wave-speed media	402
<b>Short Communications</b>	
JI, Z.L., Boundary element analysis of a straight-through hybrid silencer	415
WANG, X.H., XU, B. and REDEKOP, D., Theoretical natural frequencies and mode shapes for thin and thick curved pipes and toroidal shells	424
LEE, C.-M., BOGATCHENKOV, A.H., GOVERDOVSKIY, V.N., SHYINKARENKO, Y.V. and TEMNIKOV, A.I., Position control of seat suspension with minimum stiffness	435
