

(Contents continued from outside cover)

WU, J.-C., CHIH, H.-H. and CHEN, C.-H., A robust control method for seismic protection of civil frame building	314
TONG, F., TSO, S.K. and HUNG, M.Y.Y., Impact-acoustics-based health monitoring of tile-wall bonding integrity using principal component analysis	329
SWAIN, A.K., MENDES, E.M.A.M. and NGUANG, S.K., Analysis of the effects of time delay in nonlinear systems using generalised frequency response functions	341
Short Communications	
SANDHAM, N.D., MORFEY, C.L. and HU, Z.W., Sound radiation from exponentially growing and decaying surface waves	355
BUCHANAN, G.R., Galerkin finite element derivation for vibration of a thermopiezoelectric structure	362
KUDLIČKA, J., Dispersion of torsional waves in a thick-walled transversely isotropic circular cylinder of infinite length	368
HAN, N., QIU, X.J. and MAK, C.M., A further study of the prediction method for aerodynamic sound produced by two in-duct elements	374
LEE, B.K., CARR, A.J., LEE, T.E. and KIM, I.J., Buckling loads of columns with constant volume	381
GÜRGÖZE, M. and ZEREN, S., On the eigencharacteristics of an axially vibrating viscoelastic rod carrying a tip mass and its representation by a single degree-of-freedom system	388
LE, K.N., Time-frequency distributions for crack detection in rotors—A fundamental note	397
JUNG, D. and CHUNG, J., A steady-state equilibrium configuration in the dynamic analysis of a curved pipe conveying fluid	410
Discussions	
ILANKO, S., On the bounds of Gorman's superposition method of free vibration analysis	418
CHOI, S.-B., Active structural acoustic control of a smart plate featuring piezoelectric actuators	421
LOU, P., Comments on "Vehicle-passenger-structure interaction of uniform bridges traversed by moving vehicles"	430
Book Review	
ELLIOTT, S.J., D. Guicking, Patents on Active Control of Sound and Vibration—An Overview	433
