

(Contents continued from outside cover)

SOULA, M., NASRI, R., GHAZEL, A. and CHEVALIER, Y., The effects of kinematic model approximations on natural frequencies and modal damping of laminated composite plates	315
FUJITA, K. and SAITO, T., Unstable vibration of roller mills	329
LÜ, C.F., LEE, Y.Y., LIM, C.W. and CHEN, W.Q., Free vibration of long-span continuous rectangular Kirchhoff plates with internal rigid line supports	351
HA, J.-L., CHANG, J.-R. and FUNG, R.-F., Dynamic analyses of a flexible quick-return mechanism by the fixed and variable finite-difference grids	365
CHANG, W.-D. and YAN, J.-J., Reinforcement genetic approach to coefficient estimation for multivariable nonlinear discrete-time dynamical systems	382
KERGOURLAY, G., BALMÈS, E. and LEGAL, G., A characterization of frequency–temperature–prestress effects in viscoelastic films	391
Short Communications	
TANG, Y.-G., ZHANG, S.-X. and YI, C., Nonlinear vibration behaviors of casing pipe in the deep water	408
VASSILEV, V.M. and DJONDJOROV, P.A., Dynamic stability of viscoelastic pipes on elastic foundations of variable modulus	414
MORLIER, J., BOS, F. and CASTÉRA, P., Diagnosis of a portal frame using advanced signal processing of laser vibrometer data	420
DUHAMEL, D., Shape optimization of noise barriers using genetic algorithms	432
Letter to the Editor	
JEYAKUMAR, D. and RAO, B.N., Dynamics of satellite separation system	444
