

IMPORTANT ANNOUNCEMENT

Because of the increasingly heavy flow of very good papers from research workers throughout the world, the *Journal of Statistical Physics* will be expanding in 1972. Instead of the previously announced two volumes of three issues each for the year (which in itself represented an expansion in 1972), the journal will be further expanded: three volumes, of three issues each, will be published in 1972. For those who have ordered only Volumes 4 and 5, it will be necessary to send in orders for Volume 6 also. For those who have not yet ordered subscriptions to the journal, the order should be for Volumes 4, 5, and 6 for 1972.
