

# Future Contributions to *Journal of Statistical Physics*

A Kinetic Theory of Dense Fluids

*H. Ted Davis*

Poincaré Cycles and Ergodic Behavior of a Linear Diatomic Chain

*L. S. García-Colín*

Generating Functions and the Ising Model

*Clas Blomberg*

Fluctuating Hydrodynamics and Brownian Motion

*E. H. Hauge and A. Martin-Löf*

Probabilistic Calculations on the Ground State of the Harmonic Oscillator

*L. C. Thomas*

A Class of Loss Functions of Catenary Form

*D. E. Raeside and R. J. Owen*

Equilibrium Points of Nonatomic Games

*David Schmeidler*

Nonclassical Behavior of the van der Waals Gas

*F. W. Wiegel*
