

Future Contributions to *Journal of Statistical Physics*

An Adaptation of the Lattice Gas to the Water Problem. II. Second-Order Approximation

Paul D. Fleming III and Julian H. Gibbs

A Comment on Fluctuations Around Nonequilibrium Steady States

A. Nitzan and J. Ross

Irreversible Behavior of Interacting Systems. I. The Approach to Equilibrium

Michael Coopersmith and George Mandeville

Irreversible Behavior of Interacting Systems. II. Fluctuations in Equilibrium

George Mandeville and Michael Coopersmith

Asymptotic Solutions of Continuous-Time Random Walks

Michael F. Shlesinger
