

## **Future Contributions to *Journal of Statistical Physics***

A Nonequilibrium Analogue of the Percus–Yevick Equation

*R. L. Varley*

A Nonequilibrium Entropy for Dynamical Systems

*S. Goldstein and O. Penrose*

The Effect of External Noise in the Lorenz Model of the Bénard Problem

*Annette Zippelius and M. Lücke*

Linear Systems and Gaussianity

*Z. Kotulski and A. Sobczyk*

Period-Doubling Bifurcations and Chaotic Motion for a Parametrically  
Forced Pendulum

*John B. McLaughlin*

Solution of the Ornstein–Zernike Equation for a Soft-Core Yukawa Fluid.  
II. Numerical Results

*C. C. Wright and P. T. Cummings*
