

## **This Issue is Dedicated to the Memory of Pierre Résibois**

Pierre Résibois  
1936–1979

Pierre Résibois was a close personal friend as well as a scientific collaborator. I remember with great pleasure the many hours and days we spent together talking about science, politics, and general philosophy of life. We met often, in many different places around the globe, at scientific conferences, at home and in the countryside. Many a time we argued about the BBGKY hierarchy while sitting under a tree. Working together with Pierre one not only learned deep things about statistical mechanics, but also how wonderful, unaffected, and delightful human beings can be. It was a privilege to be his friend, and his untimely death leaves a void. This issue is dedicated to his memory.
