The Incoherent Scattering Function and Related Correlation Functions in Hard Sphere Fluids at Short Times

I. M. de Schepper, M. H. Ernst, and E. G. D. Cohen

Hilbert–Enskog–Chapman Expansion in the Turbulent Kinetic Theory of Gases I

Tian-Quan Chen

Hilbert–Enskog–Chapman Expansion in the Turbulent Kinetic Theory of Gases II

Tian-Quan Chen and Miao-En Yuan

Field Theory of the Two-Dimensional Ising Model: II. Nonlocal Specific Heat

Richard A. Ferrell

Spontaneous Magnetization of Randomly Dilute Ferromagnets

Hans-Otto Georgii

Theory of Rate Constants: Master Equation Approach

Benjamin Fain

A Seven-Mode Truncation of the Plane Incompressible Navier–Stokes Equations

Valter Franceschini and Claudio Tebaldi

Variational Principle for Derivation of Macroscopic Equations

G. Saueremann and H. Turschner

Dynamical Renormalization of Kinetic van der Waals Spin Models

Attilio Stella and Raf Dekeyser

Laplace Operator and Random Walk on One-Dimensional Nonhomogeneous Lattice

V. V. Anshelevich and A. V. Vologodskii

The Validity of Nonlinear Langevin Equations

N. G. van Kampen

Evaluation of Time Correlation Functions from a Generalized
Enskog Equation

Sidney Yip, W. E. Alley, and B. J. Alder

Multiple Scattering in Random Media I. Restricted Two Body
Additive Approximation

Eugene P. Gross

Multiple Scattering in Random Media II. The Generalized 2BA for
the Uncorrelated System

Eugene P. Gross
