

Future Contributions to *Journal of Statistical Physics*

Papers presented at the Symposium on Random Walks, U.S. National Bureau of Standards, Gaithersburg, Maryland, June 28–July 1, 1982.

ARTICLES

Introduction

George H. Weiss

From Classical Dynamics to Continuous Time Random Walks

Robert Zwanzig

Stochastic Flows, Reaction-Diffusion Processes, and Morphogenesis

John J. Kozak, Michael D. Hatlee, Matthew K. Musho, Philip A. Politowicz, and Cecilia A. Walsh

Fractal and Lacunary Stochastic Processes

B. D. Hughes, E. W. Montroll, and M. F. Shlesinger

Nonexponential Decay in Relaxation Phenomena

A. K. Rajagopal, K. L. Ngai, R. W. Rendell, and S. Teitler

Master Equation Techniques for Exciton Motion, Relaxation, Capture, and Annihilation

V. M. Kenkre

Renormalization Group Approach to Random Walks on Disordered Lattices

Jonathan Machta

Theory of Hopping and Multiple-Trapping Transport in Disordered Systems

B. Movaghar, M. Grünwald, B. Pohlmann, D. Würtz, and W. Schirmacher

- Single and Multiple Random Walks on Random Lattices: Excitation and Annihilation Simulations
R. Kopelman, J. Hoshen, J. S. Newhouse, and P. Argyrakis
- Trapping of Excitation in the Average T -Matrix Approximation
D. L. Huber
- Diffusion in Random One-Dimensional Systems
J. Bernasconi and W. R. Schneider
- Random Walks on Inhomogeneous Lattices
P. W. Kasteleyn and W. Th. F. den Hollander
- Random Walks on Random Lattices with Traps
V. Halpern
- Diffusion-Controlled Reactions among Stationary Sinks
Robert I. Cukier
- Stochastic Aspects of Biological Locomotion
Ralph Nossal
- Physics of Ligand Migration in Biomolecules
Peter Hanggi
- Protein Folding as a Stochastic Process
Nobuhiro Gō
- From Random to Self-Avoiding Walks
Cyril Domb
- Renormalization Group Description of Polymer Excluded Volume
Karl F. Freed and A. L. Kholodenko
- Self-Avoiding Walks with Geometrical Constraints
S. G. Whittington
- Monte Carlo Renormalization Group Calculations for Polymers
M. Muthukumar
- On Pearson's Random Walk and Some Statistical Properties of a Quasi-periodic Observable in a Simple Quantum Model
F. T. Hioe
- Random Walk Properties of Lattices and Correlation Factors for Diffusion via the Vacancy Mechanism in Crystals
Masahiro Koiwa and Shunya Ishioka
- Energy Transfer as a Random Walk with Long-Range Steps
A. Blumen and G. Zumofen

Random Walk to and Interaction with an Impurity

Peter M. Richards

Diffusion in Concentrated Lattice Gases

K. W. Kehr

Stochastic Processes Originating in Deterministic Microscopic Dynamics

Detlef Dürr, Sheldon Goldstein, and Joel L. Lebowitz

Random Walk of Dislocations Following a High-Velocity Impact

Bruce J. West and Michael Shlesinger

Kinetics of Adsorption on Stepped Surfaces and the Determination of
Surface Diffusion Constants

C. H. Wu and E. W. Montroll

Equilibrium Folding Pathways for Model Proteins

Sanzo Miyazawa and Robert L. Jernigan
