ARTICLES

Equilibrium Shapes of Crystals in a Gravitational Field: Crystals on a Table

J. E. Avron, J. E. Taylor, and R. K. P. Zia

Crystallinity in Two Dimensions: A Note on a Paper by C. Radin

Heinz-Jürgen Wagner

A Scaling Theory of Clusters in the Lattice Gas

Ronald Dickman and William C. Schieve

Surface Properties of the Three-Dimensional One-Component Plasma

J. J. Weis and D. Levesque

Fractal Structure of Zeros in Hierarchical Models

B. Derrida, L. De Seze, and C. Itzykson

Medium-Dependent Dynamics in Fermi Systems from a Pair-Composite Viewpoint

Abraham Goldberg and Robert D. Puff

Transient Evolution Towards a Unique Stable State: Stochastic Analysis of Explosive Behavior in a Chemical State

M. Frankowicz and G. Nicolis

Bifurcations in Fluctuating Systems: The Center-Manifold Approach

E. Knobloch and K. A. Weisenfeld

Kinetic Theory of Fluctuations near a Convective Instability

T. R. Kirkpatrick and E. G. D. Cohen

Solution of a Factorizable *S*-Matrix and an Asymmetric Eight-Vertex Model

M. Doria and R. Shankar

Random Flights in Euclidean Space. I. General Analysis and Results for
Flights with Prescribed Hit Expectance Density About the
Origin

P. T. Cummings and G. Stell

A Solvable Six-Vertex Model with Defects

M. L. Glasser

Addendum: Noise-Induced Order

K. Matsumoto and I. Tsuda
