

## **ERRATUM For Supercritical Behavior of an Ordered Trajectory**

*J. Stat. Phys.* **31:1** (1983).

**Leo P. Kadanoff**

Mr. Subir Sarkar has pointed out to me a substantial error in Part 4 of this paper. The analysis (see the top of p. 20) is based upon the statement that a recursion of all  $\chi_J$  in class  $c$  fall into the same classes for each of the next  $F_c - 1$  steps of iteration. Not so. This is only true for  $F_{c-1} - 1$  steps. When this error is corrected, there are quite a few detailed changes in formulas in Sections (4.1), (4.4), and (4.5). Factors of 2's in exponents change, but the qualitative conclusions of the paper remain true. Mr. Sarkar is preparing a paper in which he describes these corrections in detail.
