ARTICLES

The Kinetic Boundary Layer for the Klein-Kramers Equation; A New Numerical Approach

Jonathon V. Selinger and U. M. Titulaer

Continuity of Type I Intermittency from a Measure Theoretical Point of View

C. Meunier

Correlations and Spectra of an Intermittent Chaos Near its Onset Point

Byon Chol So, Nobuyuki Yoshitake, Hisao Okamoto, and Hazime Mori

The Long Time and Brownian Limits for Tagged Particle Motion in Liquids

A. Masters and T. Keyes

Proof of the Existence of the Cluster Free Energy

Ronald Dickman and William Schieve

Nucleation and Metastability in Three-Dimensional Ising Models

Dieter W. Heermann, Antonio Coniglio, W. Klein, and Dietrick Stauffer

On the Validity of the Inverse Conjecture in Classical Density Functional Theory

J. T. Chayes and L. Chayes

Upper Bound on the Decay of Correlations in the Plane Rotator Model with Long Range Random Interaction

P. Picco
