

Posters

Fractal Character of Eigenstates in Disordered Systems

C. M. Soukoulis and E. N. Economou (Exxon)

Random Fields, Fractal Lattices and the Lower Critical Dimension

David Andelman, H. Orland, and L. C. R. Wijewardhana (MIT)

Competing Criticality of Short- and Infinite-Range Interactions on the Cayley Tree: Effective Dimensional Variation

Miron Kaufman (MIT) and Mehran Kardar (Harvard University)

A. C. Response of Fractal Networks

Jean-Pierre Clerc (Université de Provence), André-Marie Tremblay (Université de Sherbrooke), and Catalin D. Mitescu (Pomona College)

Tail of Classical Spectra in Random Media

Yonathan Shapir (University of Illinois and Brookhaven National Laboratory)

Percolative Conductivity in Thin Films

S. A. Solla and N. W. Ashcroft (Cornell University)

Diffusion on Percolation Clusters

C. D. Mitescu (Pomona College)

Diffusion on Random Fractals: Percolation

R. B. Pandey (Cambridge University), D. Stauffer (Boston University), A. Margolina and J. G. Tabolitsky (Princeton University)

Single Random Walker on Disordered Lattices

P. Argyrakis, L. Anacker, and R. Kopelman (University of Michigan)

Fractal Reaction Kinetics: Reacting Random Walkers

L. Anacker, R. Kopelman, and J. Newhouse (University of Michigan)

A Renormalization Group Description of Dilute Polymer Properties

Jack F. Douglas (University of Chicago)

Fractal Dimension of Dielectric Breakdown

L. Niemeyer, L. Pietronero, and H. J. Wiesmann (Brown Boveri Research Center)
