

Future Contributions to *Journal of Statistical Physics*

This special issue contains the proceedings of the Conference on Transport and Propagation in Nonlinear Systems, Los Alamos, New Mexico, May 1984.

Foreword

Gary Doolen

An Interview with Stan Ulam and Mark Kac

Mitchell Feigenbaum

Chaotic Behavior in Stellar Dynamos

N. O. Weiss

Magnetic Field Propagation in a Stellar Dynamo

Gary A. Glatzmaier

Three-Dimensional Treatment of Convective Flow in the Earth's Mantle

John R. Baumgartner

Molecular Mechanisms of Visual Excitation: A Concatenation of Non-linear Cellular Processes

M. W. Bitensky, J. S. George, M. Whalen, and A. Yamazaki

Quantum Mechanical Coherence in Human Red Blood Cells

S. Rowlands

Solitons in Josephson Junctions: An Overview

Peter S. Lomdahl

Multifluxon Dynamics in Driven Josephson Junctions

Albert Lawrence, Nung Soo Kim, James McDaniel, and Michael Jack

Superionic Conductors

W. Dieterich

Optical Solitons in a Monomode Fiber

Yuji Kodama

Aspects of Soliton Propagation in Stimulated Raman Scattering

K. J. Druhl, J. L. Carlsten, and R. G. Wenzel

Soliton Experiments in Stimulated Raman Scattering

R. G. Wenzel, J. L. Carlsten, and K. J. Druhl

Generation and Detection of Propagating Solitons in Shearing Liquid Crystals

Lin Lei, Shu Changqing, and Xu Gang

Propagation of Solitary Waves in Channels of Decreasing Depth

C. J. Knickerbocker and Alan C. Newell

Nonlinear Propagation of Ultrasound in Superfluid ^3He

P. G. N. deVegvar

Understanding the Patterns in the BZ Reagent

Paul C. Fife

Propagation into an Unstable State

Gregory Dee

Propagation of Sound at Continuous Structural Phase Transitions

F. Schwabl

Ion Acoustic Turbulence and Anomalous Transport

W. Horton

Light Scattering Studies of the Ion Acoustic Instability in a Positive Column Plasma

R. E. Slusher, C. M. Surko, and C. A. Murray

Numerical Simulation of Ion Acoustic Turbulence

E. L. Lindman

Stability of Ion Acoustic Turbulent States

D. F. DuBois and D. Pesme
