

## **Future Contributions to *Journal of Statistical Physics***

This issue contains the Proceedings of the Workshop on External Noise and Its Interaction with Spatial Degrees of Freedom in Nonlinear Dissipative Systems.

### *ARTICLES*

External Noise and Its Interaction with Spatial Degrees of Freedom in Nonlinear Dissipative Systems

*Helmut R. Brand, Charles R. Doering, and Robert E. Ecke*

Deterministic and Stochastic Effects Near the Convective Onset

*Guenter Ahlers, Christopher W. Meyer, and David S. Cannell*

Structure Changes Induced by External Multiplicative Noise in the Electrohydrodynamic Instability of Nematic Liquid Crystals

*Shoichi Kai, Hidehiko Fukunaga, and Helmut R. Brand*

Noise-Induced Intermittency in the Quasiperiodic Regime of Rayleigh-Bénard Convection

*Robert Ecke and Hans Haucke*

The Effects of Colored Quadratic Noise on a Turbulent Transition in Liquid  $^4\text{He}$

*J. T. Tough*

Noise and Superfluid Turbulence in He II: Theory

*Werner Horsthemke and Mark F. Schumaker*

A Modified Pitchfork Bifurcation as a Model of the TI-TII Transition in Liquid Helium Counterflow with External Noise

*Mark Schumaker and Werner Horsthemke*

Bifurcations under Weak Noise

*Robert Graham*

Pseudo-Regular Oscillations Induced by External Noise

*David Sigeti and Werner Horsthemke*

Power Spectra and Spatial Pattern Dynamics of a Ring Laser

*Anthony W. Yu, Govind P. Agrawal, and Rajarshi Roy*

Classical and Quantum Noise in Nonlinear Optical Systems

*Axel Schenzle*

Langevin-Like Equation with Colored Noise

*N. G. van Kampen*

Colored Noise in Activated Rate Processes

*M. M. Klosek-Dygas, B. J. Matkowsky, and Z. Schuss*

The Distribution of Exit Times for Weakly Colored Noise

*Patrick S. Hagan, Charles R. Doering, and C. David Levermore*

Numerical Simulations of Stochastic Differential Equations

*Ronald F. Fox*

Escape Driven by Strongly Correlated Noise

*Peter Hänggi, Peter Jung, and Fabio Marchesoni*

Holes in the Probability Density of Strongly Colored Noise Driven Systems

*G. Debnath, Frank Moss, F. Marchesoni, Th. Leiber, and H. Risken*

Effect of External Fluctuations on the Fréedericksz Transition in an Analogue Simulator

*N. G. Stocks, R. Mannella, and P. V. E. McClintock*

Analogue Simulation of Quantum Mechanical Systems

*N. G. Stocks, C. J. Lambert, and P. V. E. McClintock*

Analog Simulation of a Simple System with State-Dependent Diffusion

*K. Sinha and Frank Moss*

Transport as a Consequence of State-Dependent Diffusion

*M. Büttiker*

Propagation and Stability of Kinks in Driven and Damped Nonlinear Klein-Gordon Chains

*M. Büttiker and H. Thomas*

Pattern Formation in Diffusion-Limited Reactions

*Bruce J. West, Raoul Kopelman, and Katja Lindenberg*

A Physicist's Sandbox

*Kurt Wiesenfeld, Chao Tang, and Per Bak*

External Noise and the Origin and Dynamics of Structure in Convectively Unstable Systems

*Robert J. Deissler*

Spatiotemporal Chaos and Noise

*Gottfried Mayer-Kress and Kunihiko Kaneko*

Dissipation and Noise Immunity in Computation, Measurement, and Communication

*Rolf Landauer*

### SHORT COMMUNICATIONS

Lévy Walks for Turbulence: A Numerical Study\*

*G. Zumofen, A. Blumen, J. Klafter, and M. F. Shlesinger*

Combinational Tools for the Analysis of Ramified Patterns\*

*J. Vannimenus and X. G. Viennot*

\* These Short Communications are not part of the Proceedings.
