

Future Contributions to *Journal of Statistical Physics*

ARTICLES

On the Critical Exponent for Random Walk Intersections

Krzysztof Burdzy, Gregory F. Lawler, and Thomas Polaski

Kosterlitz–Thouless Transition for the Finite-Temperature $d = 2 + 1$, $U(1)$
Hamiltonian Lattice Gauge Theory

C. A. Bonato and J. Fernando Perez

A Meniscus Where Three Phases Coexist at Equilibrium: Microscopic
Derivation of the Herring Relations

Joël De Coninck, Phillipe de Gottal, and Frédéric Menu

Long-Range Inverse Two-Spin Correlations in One-Dimensional Potts
Lattices

C. F. Tejero, J. A. Cuesta, and R. Brito

Driven Nonequilibrium Lattice Systems with Shifted Periodic Boundary
Conditions

J. L. Vallés, K.-T. Leung, and R. K. P. Zia

Auxiliary Ghost Fields in Statistical Dynamics

Gerardo Munoz and William S. Burgett

Bifurcations of a Lattice Gas Flow under External Forcing

Roberto Benzi and Sauro Succi

Renormalization of Aubry–Mather Cantor Sets

J. J. P. Veerman and F. M. Tangerman

Deterministic One-Dimensional Cellular Automata

N. Pitsianis, P. Tsalides, G. L. Bleris, A. Thanailakis, and H. C. Card

Dynamics of a Soft-Spin van Hemmen Model. I. Phase and Bifurcation
Diagrams for Stationary Distributions

Luis L. Bonilla and José M. Casado

Computer Simulation of Some Dynamical Properties of the Lorentz Gas

C. G. Joslin and P. A. Egelstaff

Scattering Theory in the Linear Transport Theory of Particle Swarms

Giovanni Frosali and Cornelis V. M. van der Mee

Phase Space Density Representations in Fluid Dynamics

John D. Ramshaw

Global Existence in L^1 for the Modified Nonlinear Enskog Equation in \mathbb{R}^3

Jacek Polewczak

Quantum-Statistical Kinetic Equations

D. Loss and H. Schoeller

Entropy Production and Nonequilibrium Stationarity in Quantum Dynamical Systems. Physical Meaning of van Hove Limit

Izumi Ojima

Tangential Flow in Fluid Membranes. Absence of Renormalization Effects

H. Kleinert

Universality and Superuniversality of Multifractals in Nonlinear Resistor Networks

Raphael Blumenfeld

Program of the Statistical Mechanics on the 45th Parallel II Meeting
