

Future Contributions to *Journal of Statistical Physics*

ARTICLES

Superintegrable Chiral Potts Model: Thermodynamic Properties, an
“Inverse” Model, and a Simple Associated Hamiltonian

R. J. Baxter

Large- n Limit of the Heisenberg Model: The Decorated Lattice and the
Disordered Chain

B. A. Khoruzhenko, L. A. Pastur, and M. V. Shcherbina

Renormalization Group Studies of the Ashkin–Teller Model

Paulo Murilo C. de Oliveira and F. C. Sá Barreto

Regularity of the Density of States in the Anderson Model on a Strip for
Potentials with Singular Continuous Distributions

Abel Klein, Jean Lacroix, and Athanasios Speis

Polymers on Disordered Hierarchical Lattices: A Nonlinear Combination
of Random Variables

J. Cook and B. Derrida

Optimal Performance of a Feed-Forward Network at Statistical Discrimi-
nation Tasks

W. Bialek, R. Scalettar, and A. Zee

The Elimination of Fast Variables in Complex Chemical Reactions.
I. Macroscopic Level

J. A. M. Janssen

The Elimination of Fast Variables in Complex Chemical Reactions.
II. Mesoscopic Level (Reducible Case)

J. A. M. Janssen

The Elimination of Fast Variables in Complex Chemical Reactions.
III. Mesoscopic Level (Irreducible Case)

J. A. M. Janssen

On the Linearized Relativistic Boltzmann Equation. II. Existence of
Hydrodynamics

Marek Dudyński

A Neutral Gas Model for Electron Swarms

Stefano L. Paveri-Fontana, C. V. M. van der mee, and P. F. Zweifel
m-Particle Correlations in the N-Particle McKean Model

R. Krieg, K.-J. Schmitt, and C. Toepffer

Hausdorff Dimensions in Two-Dimensional Maps and Thermodynamic Formalism

G. Paladin and S. Vaienti

Transport Properties of the Continuous-Time Random Walk with a Long-Tailed Waiting-Time Density

Haim Weissman, George H. Weiss, and Shlomo Havlin

Direct Estimates on Intersection Probabilities of Random Walks

Yong Moon Park

Wiener Sausage Volume Moments

A. M. Berezhkovskii, Yu. A. Makhnovskii, and R. A. Suris

An Inverse Problem for Stochastic Differential Equations

S. Albeverio, P. Blanchard, S. Kusuoka, and L. Streit

Logical Reformulation of Quantum Mechanics. IV. Projectors in Semi-Classical Physics

Roland Omnès

SHORT COMMUNICATIONS

The Orientational Pair Correlation Functions in a Dense Hard Sphere Fluid at Long Times

Jan A. Leegwater and Henk van Beijeren

Zero-Frequency Elastic Moduli of Uniform Fluids

C. F. Tejero

Vectorized Multisite Coding for Hydrodynamic Cellular Automata

U. Brosa and D. Stauffer

Comment on the Calculation of Thermal Averages by Long-Time Monte Carlo Simulations

U. Staaden and M. Föhnle

Monte Carlo Evidence for a Cusp in the Uniform Susceptibility of the Site-Diluted Simple Cubic Ising Antiferromagnet

P. Braun, U. Staaden, and M. Föhnle

On the Wavelet Analysis for Multifractal Sets

J.-M. Ghez and S. Vaienti

Dynamic Monte Carlo Renormalization Group. II

L. L. Moseley, P. W. Gibbs, and Naeem Jan
