

Future Contributions to *Journal of Statistical Physics*

Special issue of invited papers dedicated to Cyril Domb, FRS, on the occasion of his retirement from Bar-Ilan University.

ARTICLES

Dedication

George H. Weiss and Michael E. Fisher

Hamiltonian Limit of the 3D Zamolodchikov Model

R. J. Baxter and G. R. W. Quispel

On the Corrections to Scaling in Three-Dimensional Ising Models

Andrea J. Liu and Michael E. Fisher

Asymptotic Behavior of Mayer Cluster Sums for the One-Dimensional Ising Model

G. S. Joyce

The Border Model in One Dimension

George A. Baker, Jr. and J. D. Johnson

On the Area of Square Lattice Polygons

I. G. Enting and A. J. Guttmann

The Transverse Correlation Length for Randomly Rough Surfaces

A. A. Maradudin and T. Michel

Universal Incommensurate Structures

A. E. Jacobs and David Mukamel

Low-Concentration Series in General Dimension

Joan Adler, Yigal Meir, Amnon Aharony, A. B. Harris, and Lior Klein

Branched Polymers in a Wedge Geometry in Three Dimensions

D. S. Gaunt and S. A. Colby

Möbius Function for the Set of Acyclic Directed Backbone Graphs

D. K. Arrowsmith and J. W. Essam

The Statistics of Derangement

J. Gillis

High-Order Cycles in the Logistic Map or Centers of Cardioids in the Mandelbrot Set

John Stephenson

On a Point of Order

D. W. Wood and J. K. Ball

On the Domb–Joyce Model for Self-Avoiding Walks in the Continuum

A. J. Barrett

Restricted Walks, Stability–Instability Transitions, and Dynamic Symmetries

F. T. Hioe

On the Asymmetry of a Random Walk in the Presence of a Field

George H. Weiss, Jaume Masoliver, and Kurt E. Shuler

Transport in Random Correlated Fields

Shlomo Havlin

Discontinuous Behavior of Effective Transport Coefficients in Quasiperiodic Media

K. Golden, S. Goldstein, and J. L. Lebowitz

Rigorous Derivation of Domain Growth Kinetics without Conservation Laws

Daniel Kandel and Eytan Domany

Phase Equilibria and Critical Phenomena in Closed Reactive Systems

M. Gitterman

The Impact of Large-Scale Computing on Lattice Statistics

J. L. Martin

On Demonstrating Cooperative Phenomena

D. C. Rapaport
