

Future Contributions to *Journal of Statistical Physics*

ARTICLES

Block Toeplitz Matrices and the Two-Dimensional Coulomb Gas Near a Wall

P. J. Forrester and T. M. Morrow

Effective-Field Theory of Spin Glasses and the Coherent-Anomaly Method. I

Naomichi Hatano and Masuo Suzuki

Fluctuations in the Motions of Mass and of Patterns in One-Dimension
Driven Diffusive Systems

H. van Beijeren

On the Parallel Dynamics for the Little-Hopfield Model

A. E. Patrick and V. A. Zegrebnoy

A Parallel Multigrid Algorithm for Percolation Clusters

R. C. Brower, Pablo Tamayo, and Bryant York

Direction-Direction Correlations of Oriented Polymers

Jeffrey D. Miller

Upper Bounds for Survival Probability of the Contact Process

Makoto Katori and Norio Konno

Scaling Properties of the Measure of Constant Topological Entropy

Yuzhen Ge

High-Density Properties of Hard Spheres within a Modified Percus-Yevick
Theory: The Role of Thermodynamic Consistency

P. V. Giaquinta, G. Giunta, and G. Malescio

Random Sequential Addition: A Distribution Function Approach

Gilles Tarjus, Pierre Schaaf, and Julian Talbot

A Kinetic Model for Droplet Growth in the Transition Regime

G. F. Hubmer and U. M. Titulaer

Chaotic Oscillations and Noise Transformations in a Simple Dissipative
System with Delayed Feedback

V. V. Zverev and B. Ya. Rubinstein

Note on Transport Processes in Dense Colloidal Suspensions

E. G. D. Cohen and I. M. de Schepper

Size Dependence of Self-Diffusion in the Hard-Square Lattice Gas

J. Jäckle, K. Fröbose, and D. Knödler

The Energy Level Spacing for Two Harmonic Oscillators with Generic Ratio of Frequencies

P. M. Bleher

A New Rigorous Upper Bound for the Inverse Critical Temperature of the Two-Dimensional Coulomb Gas

Gastão de Almeida Braga

Gravity in one Dimension: Diffusion in Acceleration

Bruce N. Miller

On the Convection of a Passive Scalar by a Turbulent Gaussian Velocity Field

T. C. Lipscombe, A. L. Frenkel, and D. ter Haar

Effects of an Oscillating Field on a Diffusion Process in the Presence of a Trap

Moshe Gitterman, Shlomo Havlin, and George H. Weiss

Fluid Dynamic Limits of Kinetic Equations. I. Formal Derivations

Claude Bardos, François Golse, and David Levermore

The Homogeneous Boltzmann Hierarchy and Statistical Solutions to the Homogeneous Boltzmann Equation

L. Arkeryd, S. Caprino, and N. Ianiro

The Inverse Conjecture for the Revised Enskog Equation

Marco Cannone and Carlo Cercignani

SHORT COMMUNICATIONS

Metastable Systems Driven by Colored Noise: The Stationary State

Ivo Klik

Trapping without Traps by Correlated Random Walks

Panos Argyrakis and Klaus W. Kehr

Simulation of Flow through a Two-Dimensional Random Porous Medium

U. Brossa and D. Stauffer

Calculation of the Permeability of Porous Media Using Hydrodynamic Cellular Automata

G. A. Kohring

Difference Between Canonical and Grand Canonical Ensembles in Discrete Lattice Gas Models

R. Németh

DEPARTMENTS

Program of the Australian Statistical Mechanics Meeting

Program of the Statistical Mechanics at the 45th Parallel 4th Annual Meeting
