

Addendum: Note on Transport Processes in Dense Colloidal Suspensions¹

E. G. D. Cohen² and I. M. de Schepper³

The curve in Fig. 5 on p. 247 of this paper was obtained using Eq. (8) of ref. 7, i.e., by carrying out the time integration of $\rho_{emc}(t)$ of Eq. (4) in ref. 7 from 10 mean free times to infinity, rather than from 0 to infinity, as in Eq. (6b) on p. 246 of the above-mentioned paper.
