ARTICLES

Introduction

The Dimer-Trimer Model for Heterogeneous Catalysis

D. ben-Avraham and J. Köhler

Fluctuation-Dominated Kinetics in the $A + B \rightarrow 0$ Reaction Between Immobile Particles

A. Blumen, S. Luding, and I. M. Sokolov

Uses and Abuses of the Langevin Equation for Chemical Reactions in Condensed Phases

Irwin Oppenheim and Alex Orsky

Some Properties of the $A + B \rightarrow C$ Reaction-Diffusion System with Initially Separated Components

Haim Taitelbaum, Shlomo Havlin, James E. Keifer, Benes Trus, and George H. Weiss

Space- and Time-Resolved Diffusion-Limited Binary Reaction Kinetics in Capillaries: Experimental Observation of Segregation, Anomalous Exponents, and Depletion Zone

Yong-Eun Lee Koo and Raoul Kopelman

The Diffusion-Limited Reaction $A + B \rightarrow 0$ on a Fractal Substrate

E. Clément, R. Kopelman, and L. M. Sander

Analytical Solution of an Irreversible Surface Reaction Model

E. Clément, P. Leroux-Hugon, and L. M. Sander

Spatial Structure in Diffusion-Limited Two-Particle Reactions

Maurly Bramson and Joel L. Lebowitz

Fluctuations and Correlations in a Diffusion-Reaction System: Exact Hydrodynamics

Charles R. Doering, Martin A. Burschka, and Werner Horsthemke

Reaction, Trapping, and Multifractality in One-Dimensional Systems

C. Van den Broeck

Trapping Aspects in Enhanced Diffusion

G. Zumofen, J. Klafter, and A. Blumen

Transient $A + B \rightarrow 0$ Reaction on Fractals: Stochastic and Deterministic Aspects

G. Zumofen, J. Klafter, and A. Blumen

- Many-Body Effects in Diffusion-Limited Kinetics
A. M. Berezhkovskii, Yu. A. Makhovskii, and R. A. Suris
- Spatial Organization in Two-Species Annihilation
S. Redner and F. Leyvraz
- Reversible Diffusion-Influenced Reactions: Comparison of Theory and Simulation for a Simple Model
Attila Szabo and Robert Zwanzig
- Reversible Trapping on a Cubic Lattice: Comparison of Theory and Simulations
Peter M. Richards and Attila Szabo
- Fluctuation Kinetics of Diffusion-Controlled Processes: Strong Effects Due to Correlations and Fluctuations
S. F. Burlatsky and G. S. Oshanin
- Reaction Kinetics in Polymer Systems
G. S. Oshanin and S. F. Burlatsky
- Population Growth in Random Media: I. Variational Formula and Phase Diagram
A. Greven and F. den Hollander
- Population Growth in Random Media: II. Wave Front Propagation
A. Greven and F. den Hollander
- Effect of Disorder on the Trapping of Frenkel Excitons in Three-Dimensional Systems
D. L. Huber and W. Y. Ching
- Quantum and Stochastic Aspects of Low-Temperature Trapping and Reaction Dynamics
P. E. Parris
- Diffusion and Reaction Among Traps: Some Theoretical and Simulation Results
S. Torquato
- One-Dimensional Non-Nearest-Neighbor Random Walks in the Presence of Traps
Robert J. Rubin
- Flux to a Trap
Robert M. Ziff
- Diffusion-Annihilation in One Dimension and Kinetics of the Ising Model at Zero Temperature
Fereydoon Family and Jacques G. Amar
- A Model of Turbulent Mixing in the $A + B \rightarrow 0$ Reaction
William D. Deering and Bruce J. West
- Bimolecular Annihilation Reactions: Immobile Reactants and Multipolar Interactions
S. Luding, H. Schnörer, V. Kuzovkov, and A. Blumen
- Scaling Properties of Diffusion-Limited Reactions on Fractal and Euclidean Geometries
Katja Lindenberg and Wen-Shyan Sheu
- Author Index to Volume 62, 63, 64, and 65
