Future Contributions to
Journal of Statistical Physics

Exponential Stability of States Close to Resonance in Infinite-Dimensional Hamiltonian Systems
Dario Bambusi and Antonio Giorgilli
Kinematics of Multigrid Monte Carlo
Martin Grabenstein and Klaus Pinn
From Ordered Bubbles to Random Stripes: Pattern Formation in a Hydrodynamic Lattice Gas
Daniel H. Rothman
Diffusive Description of Lattice Gas Models
Thomas Fiig and Henrik Jeldtoft Jensen
Ω-Expansion of van Kampen through Functional Integrals
H. Calisto and E. Tirapegui
Theory of the Dynamics of the Hopfield Model of Associative Memory
Prabodh Shukla
Riccati-Coupled Similarity Shock Wave Solutions for the Multispeed Discrete Boltzmann Models
H. Cornille and T. Platkowski
Fox Function Representation of Non-Debye Relaxation Processes
Walter G. Glöckle and Theo F. Nonnenmacher
Phase Diagram and Critical Properties of the Asymmetric Mattis Model
Yukiyasu Ozeki
Logarithmic Finite-Size Corrections in the Three-Dimensional Mean Spherical Model
Jordan G. Brankov and Daniel M. Danchev
Infinite-Scale Percolation in a New Type of Branching Diffusion Process
A. Mezhlumian and S. A. Molchanov

SHORT COMMUNICATION

On the Determination of Box Dimensions by Means of Wavelet Transforms
H. O. Rasmussen

DEPARTMENTS

Program of the 1992 Australian Statistical Mechanics Meeting
Paul A. Pearce
Program of the 68th Statistical Mechanics Meeting
