

Future Contributions to *Journal of Statistical Physics*

ARTICLES

Nonequilibrium Phase Transition in a Model of Diffusion, Aggregation and Fragmentation

Satya N. Majumdar, Supriya Krishnamurthy, and Mustansir Barma

Asymmetric Particle Systems on \mathbb{R}

J. Krug and J. Garcia

On the Effect of Stochastic Fluctuations in the Dynamics of the Lifshitz–Slyozov–Wagner Model

J. J. L. Velázquez

Shock Waves for a Discrete Velocity Gas Mixture

Carlo Cercignani and Henri Cornille

Classical Skew Orthogonal Polynomials and Random Matrices

M. Adler, P. J. Forrester, T. Nagao, and P. van Moerbeke

Ground State and Spin-Glass Phase of the Large- N Infinite-Range Spin Glass Via Supersymmetry

M. B. Hastings

Diffraction of Random Tilings: Some Rigorous Results

Michael Baake and Moritz Höffe

Shell Analysis and Effective Disorder in a 2D Froth

Y. Feng and H. J. Ruskin

Wall-Induced Density Profiles and Density Correlations in Confined Takahashi Lattice Gases

J. Buschle, P. Maass, and W. Dieterich

Spectral Gaps of Quantum Hall Systems with Interactions

Tohru Koma

Insensitivity of Quantized Hall Conductance to Disorder and Interactions

Tohru Koma

Rigidity of Interfaces in the Falicov–Kimball Model

Nilanjana Datta, Alain Messager, and Bruno Nachtergaele

Positivity and Convergence in Fermionic Quantum Field Theory

Manfred Salmhofer and Christian Wiecek

Subdiffusive Quantum Transport for 3D Hamiltonians with Absolutely
Continuous Spectra

J. Bellissard and H. Schulz-Baldes

Semi-Integral Scheme for Simulation of Langevin Equation with Weak
Inertia

Jing-Dong Bao

Survival Probabilities for Discrete-Time Models in One Dimension

Makoto Katori, Norio Konno, and Hideki Tanemura

Poissonian Behavior of Ising Spin Systems in an External Field

*A. Ganesh, B. M. Hambly, Neil O’Connell, Dudley Stark, and P. J.
Upton*
