

Future Contributions to *Journal of Statistical Physics*

ARTICLES

A Solvable Model of Interface Depinning in Random Media

Jean Vannimenus and Bernard Derrida

Unusual Corrections to Scaling in the 3-state Potts Antiferromagnet on a Square Lattice

John Cardy, Jesper Lykke Jacobsen, and Alan D. Sokal

Adsorbing and Collapsing Directed Animals

E. J. Janse van Rensburg and A. Rechnitzer

Winterbottom construction for finite range ferromagnetic models: An \mathbb{L}_1 -approach

T. Bodineau, D. Ioffe and Y. Velenik

Equilibrium Phase Transitions in Coupled Map Lattices: A Pedestrian Approach

Wolfram Just

Percolation of the Loss of Tension in an Infinite Triangular Lattice

Robert Connelly, Konstantin Rybnikov, and Stanislav Volkov

Thermodynamic Properties of the One-Dimensional Two-Component Log-Gas

L. Šamaj

Charge Correlations in a Coulomb System Along a Plane Wall: A Relation Between Asymptotic Behavior and Dipole Moment

B. Jancovici and L. Šamaj

Density Profiles in a Classical Coulomb Fluid Near a Dielectric Wall. I. Mean-Field Scheme

Jean-Noël Aqua and Françoise Cornu

Density Profiles in a Classical Coulomb Fluid Near a Dielectric Wall. II. Weak-Coupling Systematic Expansions

Jean-Noël Aqua and Françoise Cornu

Determination of the Order Parameter in Binary Fluid Mixtures

O. V. Patsahan and T. M. Patsahan

Almost Sure Weak Convergence for the Generalized Orthogonal Ensemble

Gordon Blower

On Diffusive Equilibria in Generalized Kinetic Theory

Carlo Cercignani, Reinhard Illner, and Cristina Stoica

On Spatially Homogeneous Solutions of A Modified Boltzmann Equation
for Fermi-Dirac Particles

Xuguang Lu

The Hexagon Quantum Billiard

Richard L. Liboff and Joseph Greenberg

DEPARTMENTS

Book Review: *Introduction to the Replica Theory of Disordered Statistical
Systems*

Felix Ritort

Program of the 85th Statistical Mechanics Meeting
