

Future Contributions to *Journal of Statistical Physics*

ARTICLES

Connectivity Properties of Continuum Percolation Processes on \mathbb{R}^2

Ph. Blanchard, G. Dell'Antonio, D. Gandolfo, and M. Sirugue-Collin

Statistical Dynamics of Clustering in the Genome Structure

A. Provata and Y. Almirantis

Trace Formula for Noisy Flows

Pierre Gaspard

Renormalization Approach to Optimal Limiter Control in 1-D Chaotic Systems

C. Wagner and R. Stoop

Strong Soret Effect in One Dimension

A. Garriga, J. Kurchan, and F. Ritort

Degrees of Freedom of a Time Series

M. Eugenia Mera and Manuel Morán

$SU(1, 1)$ Random Polynomials

Pavel Bleher and Denis Ridzal

Exact Mean-Field Solutions of the Asymmetric Random Average Process

Frank Zielen and Andreas Schadschneider

The Asymmetric Exclusion Process Revisited: Fluctuations and Dynamics
in the Domain Wall Picture

Ludger Santen and Cécile Appert

Hyperscaling Inequalities for the Contact Process and Oriented Percolation

Akira Sakai

The State(s) of Replica Symmetry Breaking: Mean Field Theories vs. Short-
Ranged Spin Glasses

C. M. Newman and D. L. Stein

Transition Matrix Monte Carlo Method

Jian-Sheng Wang and Robert H. Swendsen

Thermodynamic Properties of a Simple Model of Like-Charged Attracting Rods

Jürgen F. Stilck

Large-Distance Behavior of Particle Correlations in the Two-Dimensional Two-Component Plasma

L. Šamaj and B. Jancovici

Density Correlations in the Two-Dimensional Coulomb Gas

L. Šamaj and B. Jancovici

Homopolymers with Intrachain Interactions

J. K. Percus

Zero-Temperature Dynamics of Ising Models on the Triangular Lattice

C. Chris Wu

A Note on the Quantum Widom–Rowlison Model

D. Ioffe

A Note on the Metastability of the Ising Model: The Alternate Updating Case

Emilio N. M. Cirillo

Dynamical Critical Exponent for the Majority-Vote Model

Abel G. da Silva Filho and F. G. Brady Moreira

DEPARTMENTS

Book Review: *Equations of State for Fluid and Fluid Mixtures, Parts I and II*

L. S. Garcia-Colin and F. J. Uribe
