Editorial Note

Besides classical review papers *Sulfur Reports* also publishes Book Reviews and Annotated Data Sheets [see Editorial Note *Sulfur Rep.* 11, 359 (1992)].

We have now found it appropriate to launch another category of papers, the Status Paper. A Status Paper will typically be brief and contain original research work of a type which sets standards for future work in the area in question, for instance methodic or mechanistic breakthroughs, key spectroscopic data, or the synthesis of key compounds likely to interest a broad readership. It is hoped that such important papers will be more conspicuous in a review journal such as *Sulphur Reports* than when published elsewhere.

We take pleasure in introducing this new category of papers with the following Status Paper by Derbesy and Harpp [*Sulfur Rep.* 16, 363 (1995)].
