Editorial

Professor and former editor Adrian Schwan has set a very high standard of stewardship of the *Journal of Sulfur Chemistry* (JSC). The entire sulfur chemistry community owes him our gratitude for his outstanding work to establish JSC as the premier journal in the dynamic and ever expanding area of sulfur chemistry.

I am looking forward to the many challenges of editorship. My goal during the next few years is to continue to build upon the solid foundation that has been put in place since the inaugural issue in 2004. All manuscripts that fall within the aims and scope of the journal will be considered. Submission of communications that meet the requirement of urgency, timely review articles, and publication of Special Topic issues will be encouraged and actively promoted. A rigorous peer-review process will be maintained to insure the highest quality reviews, mini-reviews, full papers, and communications. Finally, I welcome all suggestions on how to improve the journal to provide an unparalleled platform to the sulfur community for the exchange of ideas and results and I look forward to working with all of you during the next few years.

Edward L. Clennan
