

## CORRIGENDA

In Volume 8 in the paper of B. Ya. Teitelbaum entitled: Some features of polymer crystallization and melting as exposed by DTA of poly(ethylene adipate) the following is to be corrected:

p. 522: the State Transition Scheme should be placed in p. 512.

In the caption of it instead of  $\beta \rightarrow g$  should read  $\beta \rightarrow \alpha$ .

At the arrow "above  $T_i$ -crystallization" instead of  $T_i$  it should read  $T_g$ .
