

1983 ACS MIDDLE ATLANTIC REGIONAL MEETING (MARM)
Pocono Hershey Resort, White Haven, Pa., April 6, 1983
Topic: Polymer Characterization by Thermal Methods -- Symposium

The following papers were presented:

Comparative curing study of commercial epoxy resins by differential scanning calorimetry

H. E. Bair (Bell Laboratories)

Prediction of service life of a polymer by thermogravimetry

J. H. Flynn (National Bureau of Standards)

Charge transfer interaction in conjugated polymers and graphite

A. R. McGhie (University of Pennsylvania)

Thermal characterization of ultradrawn thermoplastics

R. S. Porter (Massachusetts)

The application of dynamic mechanical analysis to polymers

H. W. Starkweather (DuPont Experimental Station)

Thermal analysis of isotactic polypropylene

B. Wunderlich (Rensselaer Polytechnic Institute)
