

**11TH NORDIC SYMPOSIUM ON
THERMAL ANALYSIS AND CALORIMETRY**

OULU, FINLAND, 20-22 JUNE, 1988

The 11th Nordic Symposium on Thermal Analysis and Calorimetry (11-NSTAC) will be held at the University of Oulu on June 20-22, 1988.

The meeting is being arranged in cooperation with the Nordic Society for Thermal Analysis and Calorimetry.

Theme and scope

The aim of the symposium is to report on the use of thermal analysis and calorimetry in basic and applied research and to act as a meeting place for scientists working at universities and in industries.

The scientific program will consist of invited plenary lectures, contributed oral and poster presentations. The symposium will cover all major aspects of thermal analysis and calorimetry including theory, various applications and instrumentation.

Chemists, physicists, metallurgists, material scientists, geologists and all other researchers using thermal methods of analysis or/and calorimetry are welcome to participate.

The symposium language will be English.

Publications

The abstracts of all the scientific presentations will be published in a special issue of Report Series in Chemistry, University of Oulu available to all participants at the registration.

Invited and contributed papers will be published in the conference proceedings.

The Second circular will contain further information about the Symposium including the abstract forms.

Exhibition

A trade exhibition will be arranged to coincide with the meeting. For details, please contact prof. Markku Leskela, Univ. of Turku, Department of Chemistry and Biochemistry, Vesilinnantie 5, SF-20500 Turku or Dr. Pertti Kokkonen.
