

In memoriam Doc. Ing. HELENA LANGFELDEROVÁ, CSc.

**Associated Professor at the Department of Inorganic Chemistry,
Deputy Head of the Department, and Vice-Dean of the Faculty of
Chemical Technology of the Slovak Technical University in
Bratislava, Slovak Republic**

With deep regret we announce, that one of the excellent thermoanalysts who was invited last December to be the member of our Editorial Advisory Board for the next two years passed away suddenly on January 5, 1993.

She was author and co-author of more than 50 papers dealing with the thermal study of different complexes published mainly in the *Journal of Thermal Analysis* and other top scientific journals.

The latest results of her scientific activity was her DSc. thesis that was finished some weeks ago, but unfortunately, could not be defended.

On behalf of the Editorial staff of the journal we would like to express our thanks for the excellent papers written by Dr. Langfelderová and for her outstanding activity devoted as a referee of our journal.

*John Wiley & Sons, Limited, Chichester
Akadémiai Kiadó, Budapest*

There are many thermal analysts who have known her personally, who have known her very active, charming and highly cultured personality. She had many colleagues and friends all over the world who were shocked to hear her unexpected death.

Helena, you are the victim of our generation we miss you very much.

The Editors
