

Events

17th IUPAC Conference on Chemical Thermodynamics

will be held July 28–August 2, 2002 in Rostock, Germany

Participants:

Scientists from research institutions, universities and the chemical industry active in the area of chemical thermodynamics and chemical engineering are invited to attend the conference.

Topics:

Plenary lectures, invited lectures as well as short oral and poster contributions will be presented in the following symposia:

- Molecular Simulations of Fluids and Statistical Thermodynamics
- Phase Equilibria, Supercritical Mixtures and Separation Techniques Including Polymer Systems
- Electrolyte Solutions and Non-Electrolyte Mixtures Including Reactive Systems
- Thermodynamic Properties of New and Advanced Materials
- Organized Solutions, Surface and Colloid Chemistry
- Thermochemistry, Calorimetry and Molecular Energetics Including the Laehnwitz Seminar on Calorimetry
- Theoretical Aspects and Technical Application.

Additional workshops:

Third International Workshop on Thermochemical, Thermodynamical and Transport Properties of Halogenated Hydrocarbons and Mixtures
Material and Energy Transport in Dense Membranes
Properties of Ionic Liquids and their Application in Chemical Engineering

Local organization:

Prof. A. Heintz, Prof. E. Vogel
Universität Rostock, FB Chemie,
Abt. Physikalische Chemie,
Hermannstr. 14,
D-18051 Rostock, Germany

E-mail: Andreas.heintz@chemie.uni-rostock.de; eckhard.vogel@chemie.uni-rostock.de
