Page 310. We omitted reference to the studies of Siskin et al., in which these investigators describe the partial conversion of aqueous 1-decylamine to di- and tridecylamines after heating at 250 °C: Siskin, M.; Brons, G.; Katritzky, A. R.; Balasubramanian, M. *Energy Fuels* **1990**, *4*, 475–482. See also: Katritzky, A. R.; Nichols, D. A.; Siskin, M.; Murugan, R.; Balasubramanian, M. *Chem. Rev.* **2001**, *101*, 837–892. We thank Professor Katritzky for informing us of this omission.
