

Molybdenum-Catalyzed Asymmetric Allylation of 3-Alkylloxindoles: Application to the Formal Total Synthesis of (–)-Physostigmine [*J. Am. Chem. Soc.* **2006**, *128*, 4590–4591]. Barry M. Trost* and Yong Zhang

Supporting Information: An incorrect ¹³C NMR spectrum for (–)-esermethole was included. The list of chemical shifts in the experimental section is correct. The complete, corrected set of spectra is now available.

Supporting Information Available: Spectra for all new compounds described in the original work. This material is available free of charge via the Internet at <http://pubs.acs.org>.
