**ACS Publications**  
High quality. High impact.

**Different Dynamics of Chiral and Racemic (L- and DL-) Serine Crystals: Evidenced by Incoherent Inelastic Neutron and Raman Scattering** [*J. Am. Chem. Soc.* **2007**, *129*, 10984–10985]. Heloisa N. Bordallo,\* Boris A. Kolesov, Elena V. Boldyreva, and Fanni Juranyi

Page 10984. The last sentence in paragraph 6 should read:

*“The variation in the intensity of  $g(\omega)$  above 50 meV may be accounted by multiple scattering due to the large sample thickness.”*

Supporting Information, page S1, Section B, second paragraph should read:

*“All spectra were corrected by normalization of the detectors with vanadium. The subtraction of the empty cell scattering was carried out at multiple temperatures.”*
