

Facile Synthesis of 2-(Phenylthio)phenols by Copper(I)-Catalyzed Tandem Transformation of C–S Coupling/C–H Functionalization [*J. Am. Chem. Soc.* **2010**, *132*, 15531–15533]. Runsheng Xu, Jie-Ping Wan, Hui Mao, and Yuanjiang Pan*

Page 15532. At the end of the first full paragraph, above Table 2, the statement, “Aryl iodides bearing an electron-donating group showed better reactivity than those with an electron-withdrawing group.” should be, “Aryl iodides bearing an electron-withdrawing group showed better reactivity than those with an electron-donating group.”

On the same page, in Scheme 2, Cu^{II} in intermediate complexes **III**, **IV**, and **V** should be Cu^{III}. The corrected Scheme 2 is given below.

Scheme 2. Possible Mechanism
