

## Listing of Name Reactions for Carbocyclic Ring Formations.

### **Name Reactions for Carbocyclic Ring Formations.**

Edited by Jie Jack Li. (Bristol-Myers Squibb Company).  
 John Wiley & Sons, Inc.: Hoboken, NJ. 2010. xvi + 756 pp.  
 \$149.95. ISBN 978-0-470-08506-6.

This fifth volume of *Name Reactions* focuses on the formation of carbon rings in six chapters, with the first four covering three-, four-, five-, and six-membered carbocycles and the final two encompassing large-ring carbocycles and transformations of carbocycles. Each chapter contains the following sections: Description; Historical Perspective; Mechanism; Variations and Improvements; Synthetic Utility; Experimental; and References. The book opens with a Foreword by E. J. Corey and ends with appendices featuring the Tables of Contents of the previous four volumes of the series and the upcoming sixth volume.
