

## Book Listing of Handbook of Heterocyclic Chemistry, 3rd ed.

**Handbook of Heterocyclic Chemistry, 3rd ed.** By Alan R. Katritzky (University of Florida, Gainesville, USA), Christopher A. Ramsden (Keele University, Staffordshire, U.K.), John A. Joule (The University of Manchester, U.K.), and Viktor V. Zhdankin (University of Minnesota, Duluth, USA). Elsevier: Amsterdam, Oxford. 2010. ii + 1006 pp. \$120. ISBN 978-0-08-095843-9.

The third edition of the *Handbook of Heterocyclic Chemistry* follows the general theme of the previous editions “treating structure, reactivity and synthesis systematically in terms of molecular structure” to quote from the Foreword. It consists of three main sections on structure, reactivity, and synthesis of heterocycles and contains more than 1500 illustrated structures and reactions. A very extensive list of references and thorough index complete the book.
