Page 1672. Eric C. Peters was mistakenly listed in the Acknowledgment of the published Communication rather than in the author list. Eric C. Peters should be included in the author list between Jonathan G. Swoboda and Charles Y. Cho, along with indication ([‡]) of his affiliation with The Genomics Institute of the Novartis Research Foundation.

The first sentence of the Acknowledgment should now read as follows: The authors acknowledge the efforts of John Walker for experimental support.
