

Correction to “Quantifying Functional Group Interactions That Determine Urea Effects on Nucleic Acid Helix Formation”

Emily J. Guinn, Jeffrey J. Schweinfus, Hyo Keun Cha, Joseph L. McDevitt, Wolf E. Merker, Ryan Ritzer, Gregory W. Muth, Samuel W. Engelsjerd, Kathryn E. Mangold, Perry J. Thompson, Michael J. Kerins, and M. Thomas Record, Jr.*

J. Am. Chem. Soc. 2013, 135, 5828–5838. DOI: 10.1021/ja400965n

Page 5831. In section 4.1.2, the phrase “Linear regression of the data in Figure 3...” should read “Linear regression of the data in Figure 2...”.

Page 5832. In Figure 3, predicted and observed values were inadvertently reversed for a subset of the data. The corrected figure is given below; these corrections do not affect the quality of the comparison or any of the conclusions drawn from this figure.

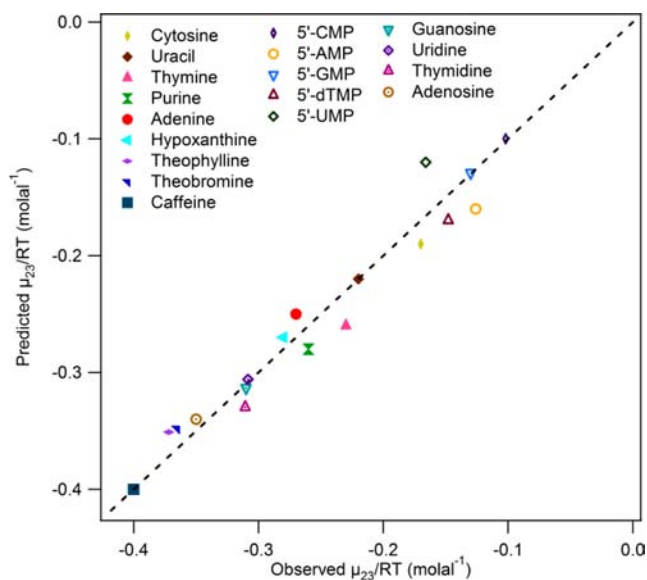

Figure 3. Predicted vs observed values of μ_{23}/RT for interactions of urea with model compounds (see Table 1). The line represents equality of predicted and observed values.
