

Correction to Multisite Prenylation of 4-Substituted Tryptophans by Dimethylallyltryptophan Synthase

Jeffrey D. Rudolf, Hong Wang, and C. Dale Poulter*

J. Am. Chem. Soc., 2013, 135 (5), 1895–1902. DOI: 10.1021/ja310734n

Compound **5** in Figure 4 mistakenly has a methyl substitution at C4 of the indole ring. Compound **5** is the 4-methoxyderivative as shown in the correct version of the figure.

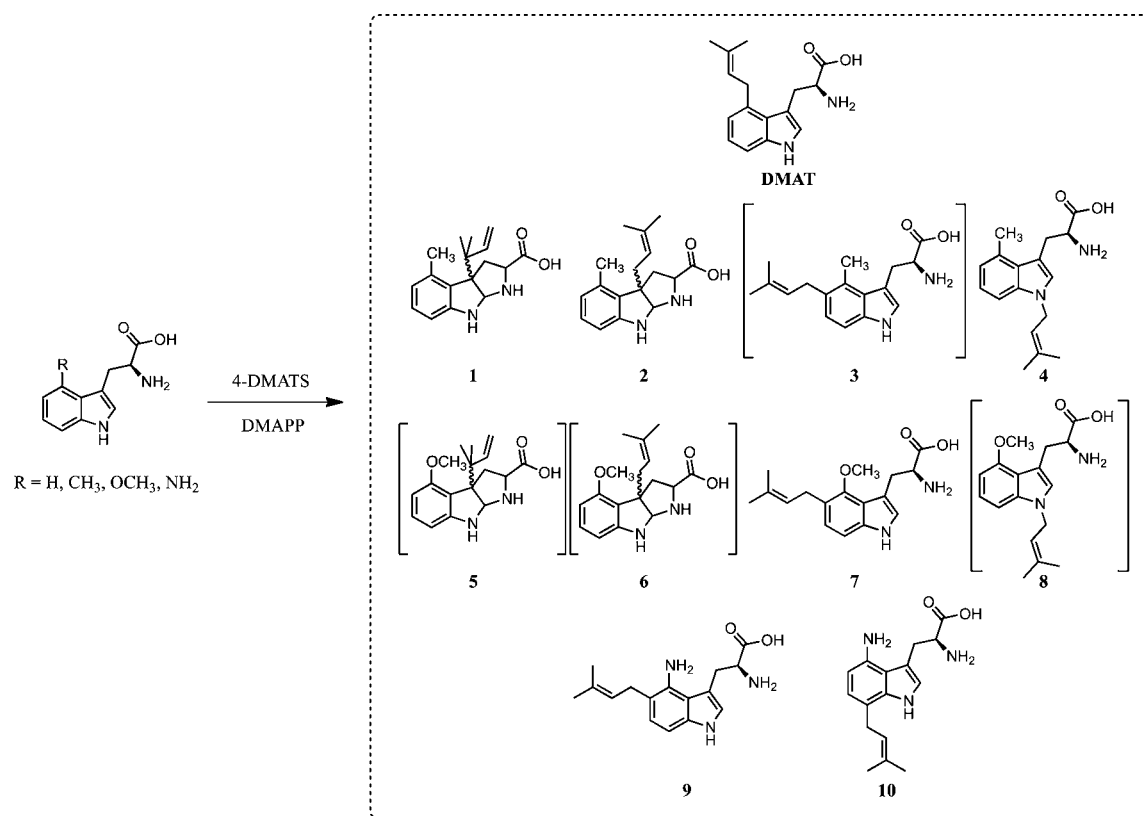

Figure 4. Characterized and proposed (bracketed) products from incubation of tryptophan analogues and DMAPP with 4-DMATs.
