OCTOBER—AOCS CONVENTION MONTH

6th, 7th and 8th at the Palmer House, Chicago

The program committee for the fall convention, headed by J. K. Gunther of Swift & Co., is winding up plans for the meeting. Working with Dr. Gunther on this program have been F. D. Snell, H. C. Black, and S. O. Sorenson.

This year, for the first time in AOCS program history, a symposium on drying oils has been organized. S. O. Sorenson of Archer-Daniels-Midland Co. has scheduled five papers on the subject which should be particularly interesting to chemists and technologists of the paint and coatings industry.

The program, subject to last minute changes and additions, follows:

Soap Section, October 6

“Rosin—Use in Salt-Water Soap”

B. S. Van Zile and J. N. Borglin
Hereules Powder Co.

“The Four Known Crystalline Forms of Soap”

R. H. Ferguson
The Procter & Gamble Co.

“The New ‘Kettle Wax’ Soap Phase in the System
Sodium Laurate—Sodium Chloride—Water”

J. W. McBain and R. C. Thorburn
Stanford University

“Effect of Sodium Hydroxide on Dissolved Soap as
Measured Conductimetrically at 40°C.”

C. A. Snell, B. P. Caldwell, F. D. Snell, and L. C. Cartwright
Foster D. Snell, Inc.

“Recovery of Glycerine from Waste Products”

R. N. DuTuis
Glycerine Producers Association

“Soap and Glycerine Outlook”

C. W. Lenth
Acting Chief, Soap and Glycerine Division, Fats and
Oils Branch, Food Distribution Administration

“Glycerin Processing—Some Notes on Inventory and
Yield Determinations”

P. Bradford, G. Mehl, and J. K. Gunther
Swift & Co.

“Laboratory Refining and Bleaching Tests for the
Commercial Evaluation of Better Quality Tal-
lows and Grease for Soapmaking”

L. B. Parsons
Lever Brothers Co.

Fat and Oil Section, October 7 and 8

“The Purification of Oleic Acid, Methyl Oleate, and
Oleyl Alcohol Suitable for Uses as Chemical Inter-
mediates”

Daniel Swern, H. B. Knight, T. W. Findley
Eastern Regional Research Laboratory

“Determining Recoverable Fat Losses in Plant Waste
Effluents”

E. N. Mortenson
Swift & Company

“Industrial Salvage of Fats and Oils”

Marcus W. Hinson
War Production Board

LECITHIN

for

FOOD and TECHNICAL PRODUCTS

ROSS & ROWE, INC.

75 Varick St.
NEW YORK 13, N.Y.

Wrigley Bldg.
CHICAGO 11, ILL.

Sole Selling Agents for
AMERICAN LECITHIN COMPANY

“The Solvent Extraction of Tung Oil by a Continu-
ous Process”

R. S. McKinney and W. G. Rose
Bureau of Agricultural and Industrial Chemistry
A. B. Kennedy
Wols Co.

“Norelac: A Proposed New Synthetic Coating”

J. C. Cowan, A. J. Lewis, L. B. Falkenburg
Northern Regional Research Laboratory

“Polyamides from Residual Dimeric Fat Acids”

J. C. Cowan, L. B. Falkenburg, P. Skell and H. M.
Teeter
Northern Regional Research Laboratory

“The Action of Peanut Oil Antioxidants in Fats of
Varying Degrees of Unsaturation”

G. D. Oliver, W. S. Singleton and A. E. Bailey
Southern Regional Research Laboratory

“Measurement of the Consistency of Plastic Vegeta-
ble Fats—A Standard Micro-penetration Technique”

R. O. Feuge and A. E. Bailey
Southern Regional Research Laboratory

“Unsaturated Synthetic Glycerides”

H. E. Longenecker and D. F. Daubert
The University of Pittsburgh

“The Latent and Specific Heats of Some Vegetable
Oils and Fats”

A. R. Gudheim
Lever Bros. Co.

“Molecular Selection of Glyceride Oils”

Stephen E. Freeman
Pittsburgh Plate Glass Co.

“Witcogum—A New Chemurgic Rubber”

C. S. Yoran, W. I. Harber, H. F. Schwarz, and
S. G. Armato
Wishnick-Tumpear, Inc.

“Solidification Point Curves of Binary Acid Mixtures
III.— $C_{24}-C_{30}$ ”

H. A. Schuette, R. M. Christenson, and H. A. Vogel
University of Wisconsin

“Filter-aid and Carbon Treatments of Prime Steam
Lard”

A. B. Cummins, L. E. Weymouth, and L. L. Johnson
Johns-Manville Corp.

“A Report on Ester Interchange”

H. J. Wright, J. B. Segur, H. V. Clark, S. K. Coburn,
E. E. Langdon, and R. N. DuPuis
Glycerine Producers Association

“Occurrence of a Trienoic Acid in Corn Oil”

B. W. Beadle, B. Eleanor Landon, H. R. Kraybill
American Meat Institute

“The Viability, Chemical Composition, and Internal
Microflora of Frost Damaged Soybeans”

Max Milner, Ben Warshawsky, I. Tervet, and W. F.
Geddes
Minnesota Agricultural Experiment Station

“Improvement of the Stability of Lard by the Addi-
tion of Certain Vegetable Oils”

R. W. Riemenschneider, W. C. Ault, J. Turer
Eastern Regional Research Laboratory

“Corn Oil Phosphatides”

Morris Mattikow
National Oil Products Co.

Symposium on Drying Oils

Thursday Morning, October 7

“Spectrographic Adsorption of Drying Oils”

J. P. Kass
Interchemical Company

“Industrial Utilization of Drying Oils in the Protec-
tive Coating Field”

Robert V. Ruthruff
The Sherwin Williams Co.

“Fish Oils in the Protective Coating Industry”

W. H. Mattil
Werner G. Smith Co.

“Composition of Drying Oils”

Alexander Schwarzman
Spencer Kellogg & Sons

“Past, Present, and Future of Drying Oils”

J. C. Konen
Archer-Daniels Midland Co.

All AOCS members planning to stay at the Palmer House, Chicago, during the fall convention, are urged to make their room reservations as early as possible.

Baker's Analyzed
THE HIGHEST TYPE OF
Chemical Reagents

Baker's
ANALYZED REAGENTS
OF THE CHEMISTS

In our convoys are hundreds of war products, coming from thousands of factories, worked upon by millions of men. Behind the quality of each product is the chemist.

Among the reliable tools for the measurement of quality are Baker's Analyzed C. P. Chemicals with the actual analysis on the label. These reagents have proved great time-savers for both the chemist and a nation at war.

Not all laboratory chemical manufacturers define purity to this degree. So be sure, when you order reagent chemicals from your favorite supplier, that you specify Baker's Analyzed C. P. Chemicals.
