

New Members

James Thomas Akehurst, superintendent of plants, Werner G. Smith Company, Cleveland, Ohio
 Merton S. Armstrong, chemist, Pratt and Lambert, Inc., Buffalo, N. Y.
 Philip Weedman Bateman, oil chemist, A. E. Staley Manufacturing Company, Decatur, Ill.
 Willis J. Beach, associate editor, Soap and Sanitary Chemicals, New York City
 Thoburn Crawford Bond, Swift and Company Refinery, Los Angeles, Calif.
 Harold McGrath Boyd, head, analytical section, General Mills, Inc., Minneapolis, Minn.
 Capt. Harold Edward Bramston-Cook, U. S. N. R., general sales manager, Oronite Chemical Company, San Francisco, Calif.
 Duncan B. Brown, Jr., plant chemist, Southern Acid and Sulfur Company, North Little Rock, Ark.
 Henry Ohning Buchanan, supervisor, shortening and oil division, Durkee Famous Foods, Elmhurst, L. I., N. Y.
 John Goode Campbell, consulting chemist, Corpus Christi, Texas
 Ronald T. Clause, Procter and Gamble Company, Cincinnati, Ohio
 Edwin R. Cousins, chemical engineer, Southern Cotton Oil Company, Gretna, La.
 David Crampton, superintendent, chemical division, Wallace and Tiernan Products Company, Inc., Belleville, N. J.
 William C. Cunningham, district chemist, Southern Cotton Oil Company, Bayonne, N. J.
 J. O. Czerwonky, owner, Associated Enterprises, Chicago, Ill.
 Martin Affonso Xavier da Silveira, president, Refinadora de Oleos Brasil, Sao Paulo, Brasil
 Francisco de Sola, partner, H. de Sola i Hijos, San Salvador, El Salvador
 Lewis Davis, treasurer, Davis and Bennett, Inc., Worcester, Mass.

Thomas C. Davis, Jr., chief chemist, Cato Oil and Grease Company, Oklahoma City, Okla.
 John Kelly Dixon, special products representative, Shell Oil Company, Inc., Houston, Texas
 Richard H. Funke, plant superintendent, the Wm. Schludberg-T. J. Kurdle Company, Baltimore, Md.
 John Walter Godbey, mechanical engineer, Girdler Corporation, Votator division, fats and oils section, Louisville, Ky.
 Olavo Pompeia da Fonseca Guimaraes, Companhia Carioca Industrial, Rio de Janeiro, Brasil
 Raymond Paul Haddon, refinery superintendent, South Texas Cotton Oil Company, Houston, Texas
 Frederick R. Haigh, chief chemist, Botany Mills, Inc., Passaic, N. J.
 John Hubbard Lathe, manager of lecithin sales, Glidden Company, Cleveland, Ohio
 Clayton E. Leavitt, senior research chemist, Lever Brothers Company, Cambridge, Mass.
 Hilaire John Lips, biochemist, division of applied biology, National Research Council of Canada, Ottawa, Canada
 John Welland McCutcheon, consulting chemist, New York City
 Cecil Howard McLain, consulting chemical engineer, Houston, Texas
 Delord Renfrew Mabry, chemical engineer, Southern Cotton Oil Company, Gretna, La.
 Herman F. Mader, Jr., Collett-Week-Nibecker, Inc., San Francisco, Calif.
 Elbert L. Metcalf, manager, technical department, R. J. Brown Company, St. Louis, Mo.
 Raymond A. Moran, research analytical chemist, Colgate-Palmolive-Peet Company, Jersey City, N. J.
 Walter A. Pons, Jr., Southern Regional Research Laboratory, New Orleans, La.
 Pall Olafsson, Icelandic States Herring Oil and Meal Factories, Siglufjordur, Iceland
 John Cannon Pearson, Jr., assistant manager, Southland Cotton Oil Co., Oklahoma City, Okla.
 James V. Porter, Minnesota Linseed Oil Paint Company, Minneapolis, Minn.

THIS LABEL

shows the actual lot analysis
 —not just maximum limits of
 impurities.

Every Baker Analyzed Label
 plainly sets forth the degree
 of purity achieved—a feature
 that insures the accuracy of
 your analytical results.

J. T. BAKER CHEMICAL CO.
 Executive Offices: Phillipsburg, N. J.

Speed with Accuracy

John Maynard Purdy, chief chemist, Lowe Brothers Company, Dayton, Ohio
 Charles D. Robeson, Distillation Products Company, Rochester, N. Y.
 C. Oscar Schmidt, Jr., vice president and general manager, Cincinnati Butchers' Supply Company, Cincinnati, Ohio
 Walter A. Smigel, general manager, R. H. Miller Company, Inc., Homer, N. Y.
 Frank A. Strauss, vice president, Barsky and Strauss, Inc., New York City
 C. L. Walker, Jr., manager, Temple Mill, Southland Cotton Oil Company, Temple, Texas
 Jen Liu Wei, superintendent, Shanghai Mill, China Vegetable Oil Corporation, Shanghai, China
 Walter H. Williamson, chemical engineer, Procter and Gamble Company, Cincinnati, Ohio

Corporation Associate

Sewall S. Brown and Company, Sewall S. Brown, proprietor, Los Gatos, Calif.

APPLICATION FOR REFEREE CERTIFICATE

A. H. Preston, Houston Laboratories, Houston, Texas, has applied for appointment as Referee Chemist on cottonseed, on fatty oils, and on oil cake and meal. The Referee Board will be glad to receive information on the qualifications of Mr. Preston from any A.O.C.S. member. Address A. S. Richardson, Chairman, A.O.C.S. Referee Board, M.A.&R. Building, Ivorydale 17, Ohio.

Hyatt award winners for 1946 are John J. Grebe and Robert R. Dreisbach of the Dow Chemical Company for work in plastics industry. Presentation was made on April 23, 1947, at the Hotel Statler, Detroit, Mich.

Dr. M. L. Crossley, director of research, American Cyanamid Company, was awarded the gold medal of the AMERICAN INSTITUTE OF CHEMISTS on May 2, 1947, at the New York meeting.

POSITION WANTED

Secretary or Assistant, univ. grad., extensive manufacturing and management experience overseas, edible oils and fats, soaps, detergents, cosmetics, research development, in or near New York City. Write Box No. 81, c/o Journal of the American Oil Chemists' Society, Chicago.

WORKS ENGINEER

Wanted: Works engineer to supervise installation, operation, maintenance, laboratory control of new plant in Baghdad, Iraq, and train operating staff producing 2,300 tons laundry and toilet soap annually plus crude glycerine. Vegetable oil refinery experience desirable but not essential. Salary, \$9,000 annually, plus living quarters, round trip expenses, annual leave, two-year contract, option for third year. Should be available by January, 1948. Box 80, American Oil Chemists' Society, 35 E. Wacker Drive, Chicago 1, Ill.

TOM COFFER EMPLOYMENT SERVICE

"Serving the Chemical Profession"

20 W. Jackson Chicago 4 Wabash 3196

Each beaker is provided with a stainless steel friction top. Diameter, 80 mm; height 115 mm; approximate capacity, 400 ml. Available from stock.

Stainless Steel Beakers spun from the highest non-corrosive grade (18-8) stainless steel have many useful applications in the laboratory. Use them for corrosive acids and other materials, for calorimeters, for reactions involving corrosive chemicals, for heating substances which might attack glass, and where the fragility of glass is objectionable. These beakers are of the type used extensively by textile and dye manufacturers for dyeing tests, and are equally adaptable to any use requiring the strength and chemical-resistant properties of the finest stainless steel.

No. 10215CY Stainless Steel Beakers..... 85c each

Packed in cartons of 48.....76½c each
