

**FAT ANALYSIS COMMITTEE**—This shot shows some of the 64 members comprising the largest A.O.C.S. committee, of which V. C. Mehlenbacher, Swift and Company, Chicago, is chairman. From left to right, around the table they are W. O. Lundberg, Wales Newby, J. P. Hewlett Jr., J. C. Konen, N. W. Ziels, Mr. Mehlenbacher, C. P. Long, F. R. Earle, E. C. Gallagher, Francis Scofield, H. A. Schuette, D. S. Bolley, and R. C. Stillman. Standing are O. S. Privett, S. J. Rini, and J. L. Schille. There are 19 subcommittees.

### Short Course for 1955 Is Approved by Board

**A**PPROVAL of a short course in 1955 was among the actions of the Governing Board of the American Oil Chemists' Society in session October 10, 1954 at the Radisson hotel, Minneapolis, with C. E. Morris, president, in the chair. Based on a recommendation by G. A. Crapple, chairman of the Education Committee, the course will probably be devoted to analytical techniques, statistical quality control and analytical control, and general background on the chemistry of fats and oils.

Other actions were as follows:

1. approval of consideration of setting up a student membership
2. authorization of an increase of \$1 a year in the subscription rate for the Journal (to \$6 for one year and \$11 for two years), effective in 1955, as recommended by A. R. Baldwin, chairman of the Journal Committee
3. approval of emeritus status for E. R. Barrow of Memphis, Tenn., a charter member of the Society and president in 1912, and for E. T. Marceau of St. Petersburg, Fla., a member since 1925.
4. acceptance of the resignation of R. W. Bates from the Referee Board and appointment of E. R. Hahn, Hahn Laboratories, Columbia, S. C., to fill the unexpired term

The Board received a formal request for section status from the president of the North Central Oil Chemists' Society, Karl F. Mattil. This was referred to a committee comprising W. A. Peterson, chairman, H. C. Black, and T. H. Hopper.

a small piece of equipment explained to him by Robert Anderson.

21. **ALOE**—In this shot the demonstrator is Donald Santo, and the visitor is H. D. Spruance, Arizona Chemical Company.
22. **BLAW-KNOX**—Framed by Blaw-Knox charts are (left to right): Glenn Prielipp, Dow Chemical Company; F. P. Parkin, Borden's Soy Processing Company, Waterloo, Ia.; John E. Jackson, University of Minnesota; and F. G. Nessler, Trojan Powder Company.
23. **SALOMON**—A visiting Englishman is at the left, R. Martin Raikes of the Fullers Earth Union Ltd. His companion is Henry G. Salomon, New York.

**BAUSCH & LOMB**  
"SPECTRONIC 20"

# SPECTROPHOTOMETER

**COLORIMETER**

Diffraction Grating Type

- ▶ Range 375 mmu in the violet to 950 mmu in infrared.
- ▶ Band width 20 mmu.
- ▶ Direct reading in transmission or optical density.
- ▶ Plug-in printed electronic circuit.

"SPECTRONIC 20", Bausch & Lomb. A wide range, compact, versatile, direct reading instrument, with high degree of accuracy, simple to operate, and at remarkably low price.

Effective band width 20 mmu. Provides monochromatic light in range from 375 mmu in the violet to 950 mmu in infrared. Wavelength dial graduated at intervals of 5 mmu.

Consisting of diffraction grating monochromator with prefocused light source and fixed slits; phototubes; electronic amplification system and built-in transformer for a. c. operation; and meter for direct indication of transmission and optical density. Three controls adjust the wavelength setting, light intensity and zero, respectively. Results are reproducible within 0.5%.

- 9084-K. "Spectronic 20", B. & L., with blue and red-sensitive phototubes and filter; for routine colorimetric determinations. For 115 volts, 60 cyc., a. c. .... 230.00
- 9085-M. Special External Voltage Stabilizing Transformer, recommended for use with above for stable operation..... 30.00
