

A new V. D. Anderson No. 81 float-type moisture trap is now available to fill the need for a simplified, low-cost, float trap on air, gas, and steam applications. It is identified as Drawing S-1555.

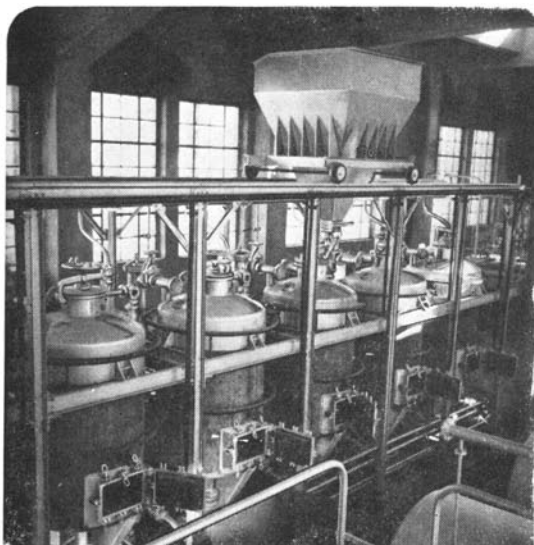

### Report on Lehigh Course to Appear in October Issue

SINCE the 1954 short course on "Inedible Fats and Fatty Acids" was held August 15-20, just at the time the September issue of the Journal was in preparation, a report on it cannot be published until the October issue. Then it is hoped that the full proceedings can be run in the November issue as a supplement. Bound reprints of the lectures will be available later.

Subjects covered in the course, the sixth to be sponsored by the American Oil Chemists' Society, were economic and technological trends, the recovery, handling, and composition of inedible fats and fatty acids, chemical reactions, technology and applications of inedible glycerides, and production and applications of fatty acids and derivatives.

Registrations received since the last issue of the Journal are as follows:

- Toshima B. Akiya, Hormel Institute, Austin, Minn.
  - A. S. Armstrong, Harshaw Chemical Company, Cleveland, O.
  - Ned B. Baker, Consolidated Chemical Company, San Francisco, Calif.
  - R. J. Bell, Mrs. Tucker's Products, Sherman, Tex.
  - Jack J. Brancato, National Lead Company, New York, N. Y.
  - Gaspar J. Cajka, Chase Chemical Corporation, Pittsburgh, Pa.
  - A. Lou Copeland, Copeland Laboratories, Toronto, Ont.
  - Eugene C. Coyner, Mallinckrodt Chemical Works, St. Louis, Mo.
  - Bernard Goldberg, Lincoln Farm Products Corporation, Newark, N. J.
  - Arthur Guillaudeu, Bode-Lowry and Associates, Chicago, Ill.
  - H. J. Harwood, Armour and Company, Chicago, Ill.
  - Edward M. Katz, Congoleum-Nairn Inc., Kearney, N. J.
  - Myron W. Kiebler, Glidden Company, Cleveland, O.
  - Uno Kruse, National Lead Company, New York, N. Y.
  - Roger P. Logan, Kessler Chemical Company, Philadelphia, Pa.
  - John R. Lyons, Sindar Corporation, New York, N. Y.
  - Thomas H. McGuine, Wilson-Martin Division, Wilson and Company, Philadelphia, Pa.
  - Allison Maggiolo, Welsbach Corporation, Philadelphia, Pa.
  - Edwin M. Meade, Meade Laboratory and Process Company, Richmond Hill, Ontario.
  - A. G. Parker, Foster Wheeler Corporation, New York, N. Y.
  - Frank I. Pole, Scarfe and Company Ltd., Brantford, Ontario.
  - Richard H. Purdy, Pacific Vegetable Oil Corporation, Richmond, Calif.
  - S. Silberstein, National Lead Company, Philadelphia, Pa.
- Chairman of the course was Daniel Swern of the Eastern Regional Research Laboratory, Philadelphia, acting under the direction of the Education Committee, of which G. A. Crapple of Wilson and Company, Chicago, is chairman.

USUAL PRESSING METHODS  
8-15% OIL LOST IN CAKE

COMPLETE EXPELLING  
5% OIL LOST IN CAKE

MODERN SOLVENT EXTRACTION  
LESS THAN 1% LOST IN MEAL

# The world wants

## the oil you waste

More than half a million extra tons of oil could be produced yearly if modern solvent extraction methods were applied to the world's output of oilseeds. Improved design of our batch, semi-continuous and continuous solvent extraction processes results in low power and steam consumption, simple and reliable operation, solvent economy and high extraction efficiency.

In addition to Solvent Extraction improved processes and plant by
