

The reason why

In these great banks of molecular stills, DPi performs the extra concentration step that makes Myverol® Distilled Monoglycerides different from ordinary mono-di emulsifiers. What this adds to the cost per pound is much less than what our customers save by emulsifying more end-product with that pound of emulsifier. That is why we keep getting more and bigger customers all the time. *Distillation Products Industries*, Rochester 3, N. Y. Sales offices: New York, Chicago, and Memphis • W. M. Gillies and Company, Los Angeles, Portland, and San Francisco • Charles Albert Smith Limited, Montreal and Toronto.

*distillers of monoglycerides
made from natural fats and oils*

Also... vitamin A for foods
and pharmaceuticals

Distillation Products Industries
