

Bond Award to Be Given in New Orleans for First Time

Francis Scofield

S. F. Herb

One of the features of the annual Awards luncheon at the 50th anniversary meeting of the American Oil Chemists' Society in New Orleans, April 20-22, at the Roosevelt hotel, will be the giving of the Bond gold medal award for the best manuscript presented at the 1958 fall meeting in Chicago.

In addition, all papers presented at the spring meeting will be judged for the 1959 award, along with the papers given at the fall meeting in Los Angeles. Rules were published in the October 1958 issue of the *Journal*: 60 points for oral presentation, 40 points for presentation of manuscript. The purpose of the award is to stimulate interest in presenting papers before the Society and in improving the over-all quality of the presentation and the manuscript.

Other awards at the Wednesday luncheon will be for participants in the Smalley check sample work and for winners in the golf tournament.

Social events at the New Orleans meeting will include a program for the ladies, past presidents' dinner at Kolb's, golf tournament Tuesday, and the banquet and dance Tuesday.

The full technical program was published in the March issue of the *Journal*, listing 59 papers in concurrent sessions. The two symposia are a) Fifty Years of Fat and Oil Research in Selected Countries of the World and b) Fifty Years of Progress in the Chemistry and Technology of Fats and Oils.

Dale V. Stingley

R. J. Vander Wal

Among the speakers are Francis Scofield, S. F. Herb, D. V. Stingley, and R. J. Vander Wal.

The Monday morning session will be devoted to annual reports. Various committees will confer during the convention, and the Governing Board will meet Sunday afternoon, with J. C. Konen presiding, and again at the close of the sessions Wednesday, with the incoming president, N. D. Embree, presiding. Election of officers will be announced Monday morning. The Uniform Methods Committee will meet Monday from 2 to 5 p.m. Anyone interested may attend.

• *New Members*

Active

- Annabel Beaty, nutrition laboratory supervisor, research and development division, National Dairy Products Corporation, Oakdale, Long Island, N.Y.
- John David Brandner, manager, physical-chemical and analytical section, Atlas Powder Company, Wilmington, Del.
- Vidabelle O. Cirino (Mrs.) associate chemist, Southern Utilization Research and Development Division, New Orleans, La.
- John Anthony Decker, chemist, The Best Foods, Division of Corn Products Company, San Francisco, Calif.
- Lara Lee DiTrapani (Miss), chemist, Southern Utilization Research and Development Division, New Orleans, La.
- Erich J. Gauglitz Jr., organic chemist, Bureau of Commercial Fisheries, Seattle, Wash.
- Edwin Patterson Jones, chemist, Northern Utilization Research and Development Division, Peoria, Ill.
- Hans Kaunitz, research associate, Columbia University, and assistant physician, Presbyterian Hospital, New York, N.Y.
- Larry Dean Kirk, chemical engineer, Northern Utilization Research and Development Division, Peoria, Ill.
- Ranko Kosanovic, chief of development, Jabon Federal, Buenos Aires, Argentina
- Herta Laszlo (Miss), chemist, Ministry of Agriculture of Brazil, technical section, Division for Inspection Animal Products, Rio de Janeiro, D.F., Brazil (American Meat Institute, Chicago, Ill.)
- Richard Lee Nelson Jr., plant chemical engineer, Procter and Gamble Manufacturing Company, Long Beach, Calif.
- William G. Quinn Jr., manager, Technical Division, The Buckeye Cellulose Corporation, Cincinnati, O.
- Lancelot H. Rees, technical director, Manton-Gaulin Manufacturing Company, Everett, Mass.
- Herbert Victor Shuster, president, Herbert V. Shuster Inc., Boston, Mass.
- Albert P. Sidaras, chief chemist, Van Leer Chocolate Corporation, Jersey City, N.J.
- Harry B. Stevenson, chemical engineer, The Procter and Gamble Manufacturing Company, Cincinnati, O.
- Marjan Nikolaj Stravs, chemist, Coconut Products Ltd., Rabaul, New Guinea
- Luther T. Stroup, research chemist, Glyco Chemicals Corporation, Williamsport, Pa.

Individual Associate

- William George Daniel Jr., chemical engineer, pilot plant, Swift and Company, Chicago, Ill.
- Royce E. Johnson, manager, special products section, Wheelco Instruments Division, Barber-Colman Company, Rockford, Ill.

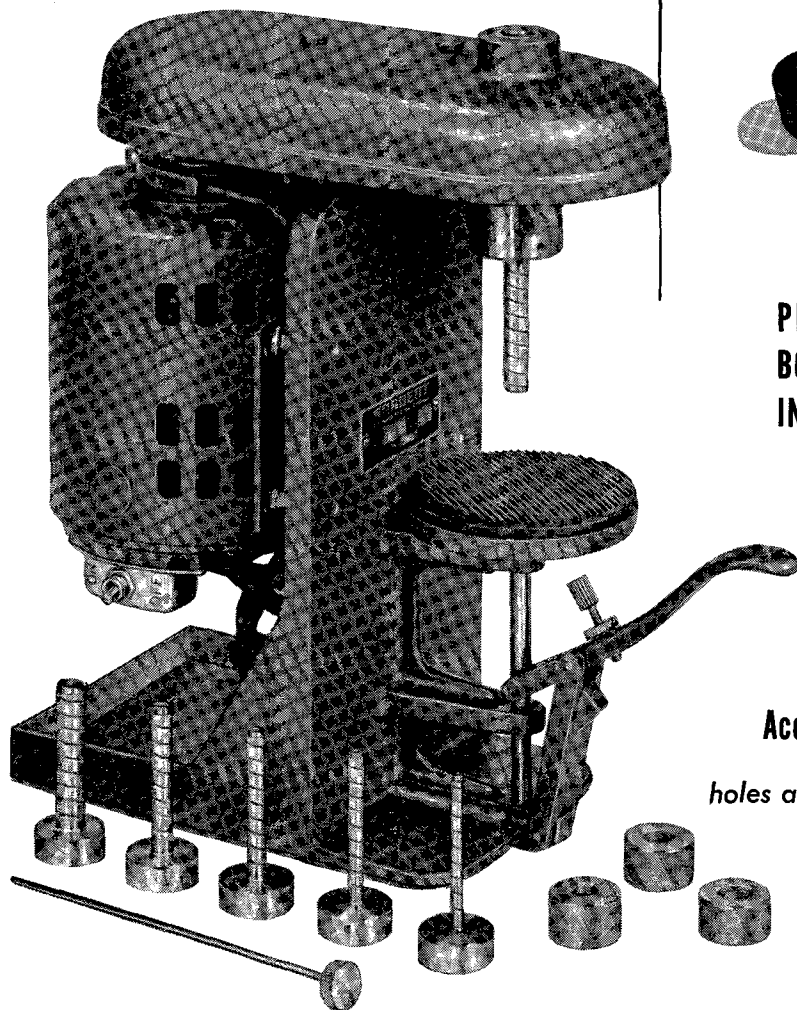

Corporation Associate

- E. S. Browning Company, James G. Markel, president, Los Angeles, Calif.

THE NEW SARGENT

POWER BORER

Designed and manufactured by E. H. Sargent & Co.

**PRECISE
BORING
IN SECONDS**

Efficient Boring • Fast and Easy To Use

Accurate Smooth Holes—*You can bore as many holes as the area of the cork or stopper will allow.*

Insures Parallel Alignment of Borings

Compact—Portable—Balanced

S-23207 POWER BORING MACHINE—Electric, Sargent. The apparatus is essentially a condensed drill press with the vertical motion inverted, the drilling platform being elevated with respect to a fixed bearing head by a compound lever mechanism. In operation the spindle which holds the borer is driven at a constant rate of 800 r.p.m. by a V-belt drive. This speed provides clean fast cutting over the entire range of common diameter from 5 to 22 mm. A safety limit adjustment saves cutting borer edges and eliminates frequent sharpening. This adjustment limit stop prevents contact of the cutting borer edge with the metal plate of the drilling platform but still permits penetration through the stopper into the rubber supporting disks and so assures clean breakout.

An ejecting rod supplied with the machine removes stopper plugs by inserting the rod through the hollow shaft and borer.

A special aluminum oxide sharpener supplied with the instrument maintains the correct cutting edge angle of the cutting borer to insure quick smooth boring and long borer life.

Height, 13½ inches; width, 6 inches; length, 14 inches; weight, 22 pounds.

Complete with six S-23211 stainless steel cutting tubes including one each size Nos. 1 to 6 inclusive, three knurled ring holders, one bottle of Aerosol, ejecting rod, aluminum oxide sharpener and three wire cord and plug for operation from 115 volt, 60 cycle A. C. circuit **\$150.00**

For complete information write for bulletin No. PB
